All forward-looking statements are subject to risks, uncertainties, expectations and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement. These forward-looking statements, whether made by us or a third party, are based on our current plans, estimates and expectations and actual results may differ materially from those suggested by such forward-looking statements.

Actual results may differ materially from those suggested by forward-looking statements due to risks or uncertainties associated with expectations relating to and including, regulatory changes pertaining to the industries in India in which we operate and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India which have an impact on its business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes and changes in competition in the industries in which we operate.

We have developed a limited number of products since incorporation and therefore, our ability to innovate new products might be limited, which may have an adverse impact on our revenue and profitability.
- We derive a significant portion of our revenue from certain of our products. If sales volume or price of such products declines in the future, or if we are unable to sell such products for any reason, our business, financial condition, cash flows and results of operations could be adversely affected.
- Our business and prospects may be adversely affected if we are unable to maintain and grow the image of our brands. Further, pursuant to the Memorandum of Understanding dated March 31, 2020 executed between M/s. Amwill Healthcare and our Company (“**Asset Transfer MoU**”), our Promoter Anand Gandhi has transferred all the trademarks which were previously owned by M/s. Amwill Healthcare. Our Company has made applications before the Registrar of Trademarks for registering the Asset Transfer MoU and change in ownership of the aforementioned trademarks, which are presently pending.

For further discussion of factors that could cause the actual results to differ from our estimates and expectations, see “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” beginning on Page Nos. 27, 109 and 214, respectively, of this Prospectus. INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

1. *We have appointed one of our Promoter Group entities, M/s. Amderma Healthcare LLP as a carrying and forwarding agent for storing, delivering and distributing our products. Consequently, we derive all of our revenue from M/s. Amderma Healthcare LLP. Any non-performance or breach of covenants of the carrying and forwarding agreement executed with M/s. Amderma Healthcare LLP may adversely affect our business operations, profitability and cash flows.*

Our Company is engaged in the business of development of problem solving dermatological, cosmeceutical and aesthetical products. In order to direct all our efforts towards product formulation and development, we have outsourced key functions such as manufacturing, prototype development and distribution to third parties, for effective management and execution. In line with the above, our Company has created a structured storage and distribution chain through one of its promoter group entities, namely, M/s. Amderma Healthcare LLP (“Amderma”), wherein we have engaged Amderma in the capacity of a carrying and forwarding agent. In view of the above, our Company has entered into a carrying and forwarding agreement dated May 15, 2024 which was effective from January 1, 2024, with Amderma, for the purpose of appointing Amderma as a carrying and forwarding agent (“CF Agreement”). Under this arrangement, we sell all of our products to Amderma for the purpose of storing, delivering and distributing the same in the regions that we operate. In accordance with the CF Agreement, our Company upon receiving an order from wholesalers, doctors, hospitals, nursing homes, etc., passes on the order for execution to Amderma, by selling all our products to Amderma. The orders issued by our Company to Amderma are recorded in the books of accounts of Amderma and are thereafter executed by it. Accordingly, we derive all of our revenue from Amderma. Amderma as a carrying and forwarding agent is responsible for executing *inter alia* the following functions:

- storing the products sold to it by our Company and maintain a stock based on the estimated sales which would be undertaken in each of the territories;
- obtaining a comprehensive insurance cover for all the stock lying at its premises, at its own cost;
- Within Agreed time period of the receipt of the orders from any of our customers on any working day, executing such orders by raising the invoices to the customers concerned;
- delivering the products to customers in the standard consumer packs in which the products were packed by our Company and in packages in which they were delivered to Amderma;
- following up of the stocks in transit until stocks are received by it and or delivered to customers (including inter location transfers) safely; and
- following up on outstanding payments from the customers in line with the procedure prescribed by our Company. The responsibility of collection will be with Amderma with collective efforts of our Company.

In consideration of the services rendered by Amderma, it receives a margin not exceeding a percentage of 4% on the purchase price of the products, while billing to the customers. The margin on each product varies and is decided by our Company in consultation with Amderma. In addition to the above, Amderma is also responsible for bearing the freight costs, incurred while dispatching the products.

The details of revenue earned by our Company from M/s. Amderma Healthcare LLP during the six-month period ended September 30, 2024 and the Fiscals ended March 31, 2024, March 31, 2023 and March 31, 2022 have been provided below:

(₹ in lakhs)

S. No.	Name of the customer	Six-month period ended September 30, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
		Amount of revenue earned	% of total revenues	Amount of revenue earned	% of total revenues	Amount of revenue earned	% of total revenues	Amount of revenue earned	% of total revenues
1.	M/s. Amderma Healthcare LLP	2,277.40	98.35%	4,349.09	98.96%	2,963.58	98.24%	2,489.43	90.15%

We are significantly dependent upon Amderma for storing and distributing our products to our customer in a timely and efficient manner. In the event, we experience significant increase in demand, we cannot assure you that Amderma will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. Since, we are dependent upon Amderma for distributing our products, our ability to diversify our storage and distribution operations to third party carrying and forwarding agents is significantly limited. Accordingly, the

performance of Amderma and its ability to reach out to our end use customers and execute orders efficiently and in a timely manner is crucial to the future growth of our business. Amderma may not continue to be successful in efficiently distributing our products. Our reliance on Amderma may also make it more difficult for us to accurately forecast the results of our operations. Our dependence on partnerships with Amderma to distribute our products may subject us to a number of risks, including:

- not being able to control the amount and timing of resources that Amderma may devote towards storage, maintenance and distribution of our products; and
- significant changes in its business strategy that may adversely affect its willingness or ability to fulfil its obligations under any arrangement.

Additionally, Amderma may make important distribution and other commercial decisions concerning our products without our input. As a result of this arrangement, some of the variables that may affect our business are not exclusively within our control. Further, our arrangement with Amderma may be terminated upon breach of contractual obligation. We may not be able to renegotiate these contract arrangements on reasonable terms or find suitable alternatives in the future. Further, since we have executed a CF Agreement with Amderma, replacing it with a third party carrying and forwarding agent could be a time-taking process and may also lead to breach of our agreement with it. While, the CF Agreement executed by our Company with Amderma contains a non-compete clause which restricts Amderma from engaging in business similar to that of our Company for a period of twelve months from the termination of the CF Agreement. Further the CF Agreement also prescribes an exclusivity period starting from the effective date of this Agreement until completion of the non-compete period provided above, during which Amderma will not work for, associate with, carry on, engage in or be concerned in any manner, in any activity / business which is similar to, or competes with, the business of our Company. Further during such period, Amderma shall exclusively service our Company as the Carrying and Forwarding Agent, and shall not serve any other party / business in the said capacity. We cannot assure you that post termination of the CF Agreement or during the CF Agreement Amderma will not carry out similar business activities or approach any of our end use clients and collaborate with other manufacturing companies for marketing and selling their products to our clients. In the event any of the aforementioned events occur, and if our end use customers and medical professionals get inclined towards such competitive products, our customer base, revenue from operations and business operations might be adversely impacted. We may need to litigate Amderma or litigations may be filed against us for any breach or termination of the contract or for inappropriately approaching our clients, such litigation could be time consuming and costly and the outcome cannot be guaranteed. Further, the term of the contracts entered by our Company with Amderma is for a period of five year, which are renewable at the end of the term, for additional periods, on terms mutually agreed between the parties, on expiry of such contracts, our Company or Amderma may not renew the contracts. In the event the CF Agreement is not renewed by either of the parties, we cannot assure you that we will be able to suitably substitute Amderma with a third party carrying and forwarding agent, in a timely manner who shall be efficiently able to carry out functions of Amderma. In the event there is a delay in appointing another carrying and forwarding agent, the execution of orders received from our end use customers may suffer considerable delay, consequent to which our ability to cater to the demand of the end use customers could be significantly curtailed. While the aforementioned events have not occurred in the past, however any future occurrence of any such events could materially affected our financial condition, results of operations and prospects.

2. *We rely on third party contract manufacturers for manufacturing products of our Company.*

We are a derma-cosmetic company, engaged in the business of product formulation and development of diverse dermatological products. The product portfolio of our Company is divided into two categories, namely, (i) development and contract manufacturing of generic dermatological solutions; and (ii) developing and formulating solutions to specific dermatological problem. The core focus of our Company is on development of problem solving dermatological, cosmeceutical and aesthetic products, and therefore to direct all our efforts towards product formulation, product development, marketing and sales, we have outsourced key functions such as manufacturing, prototype development and distribution to third parties, for effective management and execution. Accordingly, we do not undertake manufacturing operations in respect of our products and have engaged contract manufacturers for manufacturing our products, in accordance with the technical and quality specifications prescribed by our Company. Our contract manufacturers have requisite certifications to undertake manufacturing of our derma-cosmetic products, in a manner that is compliant with the regulatory guidelines and ensures that the final product meets high-quality standards. We have also executed formal arrangements with majority of the contract manufacturers, which govern various matters such as, specification of manufacturing products, quality standards to be maintained, sales estimates, packaging of products, use and protection of intellectual property, *etc.* Consequently, we rely on certain third parties for manufacturing our products. At present, for contract manufacturing, we are associated with thirty-seven (37) pharmaceutical companies / entities who manufactures our products as per our order. Moreover, as per terms of agreement such companies are having lead time of 50 days to complete our manufacturing order, from the date of

receipt of our purchase order. Our company has to schedule manufacturing plan, as we cannot enforce such manufacturing companies to manufacture as per our schedule. Any decline in the quality of medicines manufactured or delay in delivery of products by such parties or rise in job work charges may adversely affect our operations.

We have entered into formal agreements with our contract manufacturers and therefore are completely dependent upon them for timely manufacture of our products. The expenses incurred by our Company from top ten contract manufacturers during the preceding three years and the six-month period ended September 30, 2024 have been provided below:

In the event, we experience significant increase in demand, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. Further, in accordance with some of the formal agreements executed by our Company with our contract manufacturers, our Company is mandated to check the quality of products received from contract manufacturers on a sample basis and raise quality concerns in a limited period of time. Upon expiry of such time period, some of the formal agreements executed with our contract manufacturers restrain us from raising any quality issues, unless the same are reported by the market intermediaries. Therefore, in the event after purchase of products, if the quality of our products are sub-standard, we may not be able to return the same to our contract manufacturers or obtain a refund for the amount spent towards purchase of products. We may have to order a fresh batch of products, which may be costly and time consuming. Further, in the event we are unable to detect defects in the products received from contract manufacturers, we may face product liability claims which could impact our image and reputation. While the aforementioned events have not materially occurred in the past, occurrence of any such events in the future may adversely affect our business operations and financial conditions.

Further, any discontinuation of manufacturing of products by our contract manufacturers or a failure of these contract manufacturers to adhere to the delivery schedule or the required quality and quantity could hamper our business operations. There can be no assurance that strong demand, capacity limitations or other problems experienced by our contract manufacturers will not result in occasional shortages or delays in their supply of products to us. Further, since we have executed formal agreements with our contract manufacturers, replacing our contract manufacturers could be a time-taking process and may also lead to breach of our agreements with them. We may need to litigate our contract manufacturers or litigations may be filed against us for any breach or termination of the contract, such litigation could be time consuming and costly and the outcome cannot be guaranteed. Further, the term of the contracts entered by our Company with our contract manufacturers ranges for a period of two years to five years, which are renewable at the end of the term, for additional periods, on terms mutually agreed between the parties, on expiry of such contracts, our Company or our contract manufacturers may not renew the contracts. On the occurrence of any of the aforementioned events, we may need to find a new contract manufacturer for manufacturing our products, which could be time taking and costly. We cannot assure you that any other contract manufacturers that we engage would be able to manufacture our products, compliant with our quality standards, in a timely and cost effective manner or at all. While the aforementioned events have not occurred in the past, however any future occurrence of any such events could materially affected our financial condition, results of operations and prospects. Further there can be no assurance that such parties shall continuously provide their services or would not cater to demand of competitors. Any withdrawal of services from such manufacturers or supply of services to competitors at better rates may adversely affect our result of operations and future prospects. Further we are also exposed indirectly to the risks these manufacturers face. For further details, please see “Our Business” on page 109 of this Prospectus.

3. *Our commercial success is largely dependent upon our ability to develop and devise problem solving derma-cosmetic products. We have developed a limited number of products since incorporation and therefore, our ability to innovate new products might be limited, which may have an adverse impact on our revenue and profitability.*

We are a derma-cosmetic company, engaged in the business of product formulation and development of diverse dermatological products. The product portfolio of our Company is divided into two categories, namely, (i) development and contract manufacturing of generic dermatological solutions; and (ii) developing and formulating solutions to specific dermatological problem. Since incorporation of our Company, has developed seven new products, namely proputor tabs, XL hydra cream, ozederm cream, PD-pill 10 tablets, XL aqua moisturising lotion, ultra kromaglo effervescent tablets and depimed ultra cream. Out of these products, our Company did not receive a positive response for PD -pill 10 tablets, proputor tabs and ozederm cream and therefore has discontinued formed two products. For details in respect of the usage of the products developed by our Company, please refer to “Our Business-Case Studies” on page 126 of this Prospectus. Our Company had executed an Asset Transfer MoU dated March 31, 2020 with M/s. Amwill Healthcare, represented by its sole proprietor, Anand Gandhi for purchasing its assets, including its intellectual property rights and dermatological products. While, pursuant to the Asset Transfer MoU the products developed by our Promoters under M/s. Amwill Healthcare were added in our product portfolio, however if

we are unable to develop additional products, our product portfolio might become redundant and conventional. For further details, please see “History and Certain Corporate Matters” on page 152 of this Prospectus.

Since, we primarily develop dermatological products, it is imperative for our Company to continuously improve existing product portfolio and develop innovative and diverse applications of our products towards various dermatological problems which would help us to increase the outreach of our products and help us maintain and deepen our position in the market. We might have to invest a large amount of our resources and funds in product formulation and development and marketing to ensure that we continue to provide diverse application of our products to our customers and are able to meet their customized demands of our products, which may skew the resource allocation from other business activities, and possibly impacting our revenues and profitability. Further, we do not have an in-house research and development department and therefore during the ordinary course of business, we seek advice from various dermatologists and medical professionals, to develop solutions for various dermatological problems. In the event, our Company fails to maintain cordial relations with such dermatologists and medical professionals or if the dermatologists associate with our competitors for the purpose of developing competitive products, our product development capabilities could be adversely impacted. Further, since we do not have our own research and development department we may not be able to substitute our dermatologists and medical professionals who have been associated with us since incorporation. In the event, we do substitute our dermatologists and medical professionals, they may not be able to contribute as effectively as our existing panel of dermatologists and medical professionals towards our product development initiatives. Therefore, the commercial success of our business is highly dependent on our ability to develop products along with our dermatologists and medical professionals which do not have a substitute and which makes our products unique and irreplaceable and maintain our professional relationship with our dermatologists and medical professionals. Our failure to effectively react to these situations or to successfully introduce new variants or new applications for our existing products could adversely affect our business, prospects, results of operations and financial condition.

4. *We derive a significant portion of our revenue from certain of our products. If sales volume or price of such products declines in the future, or if we are unable to sell such products for any reason, our business, financial condition, cash flows and results of operations could be adversely affected.*

If the sales volume or pricing of the aforementioned products declines in the future due to any reason, such as shortage in the supply of raw materials, disruption in the manufacturing process, decrease in consumer demand; or if this product may no longer be sold due to withdrawal or cancellation of applicable regulatory approvals, etc. our business, financial condition, cash flows and results of operations could be adversely affected. There have been instances in the past wherein we had to withdraw certain of our products on account of reduced customer response, lack of profit margin and lackadaisical market response. Occurrence of any such events in respect of our best selling products could have an adverse impact on our business, results of operations and financial condition.

5. ***Our business and prospects may be adversely affected if we are unable to maintain and grow the image of our brands. Further, pursuant to the Memorandum of Understanding dated March 31, 2020 executed between M/s. Amwill Healthcare and our Company (“Asset Transfer MoU”), our Promoter Anand Gandhi has transferred all the trademarks which were previously owned by M/s. Amwill Healthcare. Our Company has made applications before the Registrar of Trademarks for registering the Asset Transfer MoU and change in ownership of the aforementioned trademarks, which are presently pending.***

Our Company has created a brand presence for our products with our brands such as “”, “”, “”, “”, etc. For further details of our brands and the trademarks of our Company, please refer to the chapters titled “Our Business- Intellectual Property Rights” and “Government and other Statutory Approvals- Intellectual Property Related Approvals” on pages 135 and 231 of this Prospectus. We sell our products under our brands through our Promoter Group entity, M/s. Amderma Healthcare LLP, which we believe are recognized by our customers, as they provide solutions to certain identified dermatological problems. We believe our brand’s image serve in attracting customers to our products in preference over those of our competitors. Maintaining and enhancing the recognition and reputation of these brands is critical to our business and competitiveness. Many factors, some of which are beyond our control, are important for maintaining and enhancing our brands, including maintaining or improving customer satisfaction and the popularity of our products and increasing brand awareness through brand building initiatives. In particular, if we launch new products and if any of those products do not meet standards for quality and performance or customers’ subjective expectations, our brands’ reputation and the sales of our products may be impacted. If we fail to maintain our reputation, enhance our brands’ recognition or increase positive awareness of our products, or the quality of our products declines, our business and prospects may be adversely affected.

Furthermore, our Company executed an Asset Transfer MoU with M/s. Amwill Healthcare, represented by its sole proprietor, Anand Gandhi for purchasing the assets of the M/s. Amwill Healthcare, including its intellectual property rights as described in the Asset Transfer MoU for a consideration of ₹ 91.06 lakhs. Upon execution of the Asset Transfer MoU, the assets of M/s. Amwill Healthcare, including its intellectual property rights shall be deemed to be transferred to our Company, on a going concern basis. The details of the transferred trademarks can be seen in the chapters titled, “*Our Business-Intellectual Property Rights*” and “*Government and other Statutory Approvals-Intellectual Property Related Approvals*” on pages 135 and 231 of this Prospectus. We have made applications before the Registrar of Trademarks, for registering the Asset Transfer MoU and to update the status of ownership of the aforementioned trademarks on the website maintained by the Registrar of Trademarks. We cannot assure you that the applications made will be accepted and that we will be able to update the status of the transferred trademarks with the Registrar of Trademarks. Further, in the event we are unable to update the status of the transferred trademarks with the Registrar of Trademarks, our Promoters may initiate legal action against our Company on account of passing off of the trademark. In the event, our Promoters file a litigation against us, such litigation could be time consuming and costly and the outcome cannot be guaranteed. Further, the outcome of such litigations may not always be in our favour and we may also be exposed to the risk of losing our goodwill and the brands under which we sell our products. Additionally, we cannot assure that we will continue to be able to fully protect our intellectual property in the best possible manner for marketing our products. As a result our business, financial condition, results of operations and prospects could be materially and adversely affected.

6. ***If we are unable to anticipate and respond to changes in the market trends and changing customer preferences in a timely and effective manner, or if we fail to maintain our reputation, brand value or increase the market for our products, the demand for our products may decline.***

Since incorporation of our Company, has developed seven new products, namely proputor tabs, XL hydra cream, ozederm cream, PD-pill 10 tablets, XL aqua moisturising lotion, ultra kromaglo effervescent tablets and depimed ultra cream. Out of these products, our Company did not receive a positive response for PD -pill 10 tablets, proputor tabs and ozederm cream and therefore has discontinued the former two products. For details in respect of the usage of the products developed by our Company, please refer to “*Our Business- Case Studies*” on page 126 of this Prospectus. Our Company had executed an Asset Transfer MoU dated March 31, 2020 with M/s. Amwill Healthcare, represented by its sole proprietor, Anand Gandhi for purchasing its assets, including its intellectual property rights and dermatological products. While, pursuant to the Asset Transfer MoU the products developed by our Promoters under M/s. Amwill Healthcare were added in our product portfolio, however if we are unable to develop additional products, our product portfolio might become redundant and conventional. For further details, please see “*History and Certain Corporate Matters*” on page 152 of this Prospectus.

In order to remain competitive, we are required to review the performance of our existing products and take necessary actions to improve functionality and/or efficiency and also identify new applications for our existing products and new potential products, in compliance with applicable regulatory standards. Our future investments towards product development could result in higher costs without a corresponding increase in revenues. However, we cannot assure you that the product development initiatives taken by our Company would succeed or result in an improvement in either our existing products or development process which may affect our ability to compete with our competitors and have an adverse effect on our operations. Further, our product development initiatives with respect to developing new products may not result in the development of cost-effective or economically viable solutions, thereby affecting our operations, growth and prospects. Our business is highly dependent on our ability to compete in the industry by devising innovative products in the dermatological industry. If we are unable to gauge the changing technology and demand in the industry and are unable to upgrade our product portfolio in line with the same it may have an adverse effect on our business operations. The dermatological industry rapidly innovates technology and advancement in the research and development of the products. Therefore, results of our operations are dependent on our ability to anticipate, gauge and respond to such changes and devise new products or modify our existing products in lines with the changes in market trends as well as customer demands and preferences. If we are unable to respond to the technological advancements or in the event we are unable to upgrade our products periodically as per the prevalent market trends, or if we are unable to adapt to such changes by launching new products as per the demand, we may significantly lose our market position and existing customer base which may adversely affect our results of operations and financial condition.

7. ***Our business largely depends on the performance of our marketing team. Further, the success of our products are dependent upon dermatologists and medical professionals accepting our products and prescribing them to their patients. Any non-performance by our marketing team to market our products before the dermatologists and***

medical professionals, may adversely affect our business operations, profitability and cash flows.

Our Company markets its products through a hierarchy of senior managers, regional managers, area managers and sales executives who implement our sales and marketing strategies across the states of Karnataka, Andhra Pradesh and Telangana. As on September 30, 2024, our marketing team consists of 59 employees. Our marketing team approaches various doctors for marketing and selling our products in various regions, where we are currently present. Our business hence largely depends on the performance of our marketing team, who may be responsible for selling our products to end users. The success of our products also depend on the acceptance of our products by dermatologists and medical professionals. Our marketing team approach various dermatologists and medical professionals to market and sell our existing and new products. The orders procured by our marketing team are forwarded to Amderma Healthcare LLP for execution. The orders procured by our marketing team are recorded in the books of accounts of Amderma and are thereafter executed by it. In the event our marketing team fails to effectively market our products by providing a detailed product specification and summary to the dermatologists and medical professionals, we may not be able to expand our end user base. Further in the event dermatologists and medical professionals are not convinced about the efficacy of our products or receive a negative review about our product from their patients they may no longer prescribe our products. We cannot assure you that our marketing team will effectively place our products before the dermatologists and medical professionals and that such doctors will further prescribe our products to their patients. We can give no assurance that the performance of our marketing team will meet our required specifications or performance parameters. As a result, our growth, results of operations and the integrity of our brand name is dependent on the performance of our marketing team. Moreover, there can be no assurance that our marketing team will be able to generate adequate revenue consistently.

8. *Our operations are concentrated in the states of Karnataka, Andhra Pradesh and Telangana. If revenues from these states decline, our business, results of operations and financial condition would be adversely affected.*

Our operations are concentrated in the states of Karnataka, Andhra Pradesh and Telangana. The economic and regulatory conditions in the aforementioned states may be affected by various factors outside our control, including prevailing local, social and economic conditions, changes in the applicable governmental regulations, demographic trends, changes in regulations governing employment of labourers, fluctuation in the income levels and interest rates, among other factors. Further, since our operations are concentrated in the states of Karnataka, Andhra Pradesh and Telangana any political disruption, natural calamities or civil disruptions, opposition and protests, particularly in locations where we operate, could adversely affect our business operations or strategy. There is no assurance that such disruption in business operations would not bring any hindrance in the functioning of our Company and our distributor M/s. Amderma Healthcare LLP. Consequently, our business, results of operations, cash flows and financial condition have been and will continue to be heavily dependent on the performance of, and the prevailing conditions affecting the dermatological industry in the locations in which we operate. Further, as a result, any local social unrest, natural disaster or breakdown of services and utilities in Karnataka, Andhra Pradesh and Telangana, could have material adverse effect on the business, financial position and results of our operations.

Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our operations in Karnataka, Andhra Pradesh and Telangana may also require us to cease or limit our operations until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

9. *If we or M/s. Amderma Healthcare LLP are unable to collect our dues and receivables from end users, our results of operations and cash flows could be adversely affected.*

We extend credit to M/s. Amderma Healthcare LLP for a period ranging from 45 days to 60 days. Consequently, we are exposed to the risk of the uncertainty regarding the receipt of these outstanding amounts. As a result of such industry conditions, we have and may continue to have relatively high levels of outstanding receivables and there may be an impact on our cash flow statement. Our trade receivables for the six month period ended September 30, 2024, Fiscal 2024, Fiscal 2023 and Fiscal 2022 were ₹ 1,129.61 lakhs, ₹ 1,286.27 lakhs, ₹ 103.61 lakhs and ₹ 63.71 lakhs, respectively. If M/s. Amderma Healthcare LLP or a significant portion of our end users default in making these payments our profits margins could be adversely affected. Our financial position and profitability therefore depend on the credit-worthiness of M/s. Amderma Healthcare LLP and the end users to which M/s. Amderma Healthcare LLP distributes our products. Certain of these end users may have weak credit histories and we cannot assure that these counterparties will always be able to pay us in a timely fashion, if at all. Any change in the financial condition

of these counterparties that adversely affects their ability to pay us may materially adversely affect our results of operations and financial condition. There is no guarantee that M/s. Amderma Healthcare LLP will be able to accurately assess the creditworthiness of our end users. Macroeconomic conditions, such as a potential credit crisis in the global financial system, could also result in financial difficulties for our customer, including limited access to the credit markets, insolvency or bankruptcy. Such conditions could cause M/s. Amderma Healthcare LLP and our end users to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables.

10. Some of our Promoter Group entities may have conflicts of interest as they are engaged in similar industry segment and may compete with us.

Our Promoters Group entities, namely, M/s. Amderma Healthcare LLP and M/s. Ample Pharma are engaged in the dermatological industry as distributors. As a result, there may be conflicts of interest in allocating business opportunities between us and our Promoters Group entities. Further, there also may be conflicts of interest between our Promoters Group entities and us in pursuing our existing line of business.

Further, M/s. Amderma Healthcare LLP has been engaged by our Company in the capacity of a carrying and forwarding agent for storing our products, delivering and distributing the same to our end use customers. Our marketing teams procure orders from our end use customers and Amderma Healthcare LLP, records those orders in its books of accounts and executes on behalf of our Company. While, the CF Agreement executed by our Company with Amderma contains a non-complete clause which restricts Amderma from engaging in business similar to that of our Company for a period of twelve months from the termination of the CF Agreement. Further the CF Agreement also prescribes an exclusivity period starting from the effective date of this Agreement until completion of the non-compete period provided above, during which Amderma will not work for, associate with, carry on, engage in or be concerned in any manner, in any activity / business which is similar to, or competes with, the business of our Company. Further during such period, Amderma shall exclusively service our Company as the Carrying and Forwarding Agent, and shall not serve any other party / business in the said capacity. We cannot assure you that post termination of the CF Agreement or during the course of the CF Agreement, Amderma will not carry out similar business activities or approach any of our end use clients and collaborate with other manufacturing companies for marketing and selling their products to our clients. In the event any of the aforementioned events occur, and if our end use customers and medical professionals get inclined towards such competitive products, our customer base, revenue from operations and business operations might be adversely impacted. Furthermore, except as disclosed above, we have not entered into any non-compete agreements with our Promoters Group entities. There can be no assurance that our Promoters Group entities will not compete with our existing business or any future business that we may undertake or that we will be able to suitably resolve such a conflict without an adverse effect on our business. In the event any of the aforementioned events occur leading to conflict of business interests between our Promoter Group entities and our Company, our revenue from operations and business operations might be adversely impacted.

11. We have a limited operating and financial history, which makes it difficult to accurately assess our future growth prospects.

Our Company was incorporated on August 21, 2017 and commenced operations in Fiscal 2020. For further information, see “History and Certain Corporate Matters” on page 152. As such, we have a very limited operating history, and our success is dependent on our ability to effectively implement our businesses. Our limited financial and operating history may not provide an accurate basis for investors to understand our business and financial history for comparative analysis and evaluate our future business and financial prospects. Assessing the future prospects of our business is challenging in light of both known and unknown risks and difficulties we may encounter, and could place significant demands on the management team and our other resources. We will be subjected to all the business risks and uncertainties associated with setting up any new business venture, which may adversely affect our business, prospects, results of operations and financial condition.

12. Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards inventories and trade receivables. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. In case of any such defaults from our debtors,

may affect our business operations and financials. For further details regarding working capital requirement, please refer to the section “Objects of the Offer” on page 81 of this Prospectus.

13. *We may not be able to correctly assess the demand for our products, which may adversely affect our business, financial condition and results of operations.*

Manufacturing and distribution processes of our products require us to anticipate the demand for our products based on the feedback received from our own marketing personnel and distributor. Accurate assessment of market demand requires significant investment in our sales and marketing network and training of marketing personnel. There is no guarantee that our estimate of market demand will be accurate. In the event that we overestimate the demand for our products, we may have expended resources in contract manufacturing excess products and paid taxes, insurance costs, distribution expenses, storage and warehousing and other related expenditures, either directly or through our contract manufacturers and M/s. Amderma Healthcare LLP. In the event of excess production, we might have to bear the cost of destruction of these goods. In the event that we underestimate the market demand or fail to order a sufficient volume of supplies and input materials from our contract manufacturers, we may be unable to meet customer demand and lose out on sales opportunities that our competitors may capitalise on. Similarly, if we fail to manage investment levels appropriately, we may be unable to meet demand, which could lead to a loss of interest and sales in our products. Failure to meet customer demand may also occur on account of lack of constant supply from our contract manufacturers in time bound manner, or we have an inaccurate level of inventory holding. Accordingly, any incorrect assessment of the demand for our products may adversely affect our business, financial condition and results of operations.

14. *We may be unable to grow our business in additional geographic regions, which may adversely affect our business prospects and results of operations.*

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Our Company currently has a presence in Karnataka, Andhra Pradesh and Telangana and we are now proposing to expand our operations in West Bengal and Odisha. We have appointed senior regional sales managers, regional sales managers and sales executives in the aforementioned states, and have commenced marketing operations in these states. Infrastructure and logistical challenges in addition to the advancement of research and development in the dermatological industry, changing end use customers’ taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, end use customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected. Further, we may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets. If we are unable to make long-lasting relations with the major customers in the proposed market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

15. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks.*

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. We cannot assure you that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may adversely affect our ability to accurately report, or successfully manage, our financial risks, and to avoid fraud, which may in turn adversely affect our business, financial condition or results of operations.

16. *Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business, financial condition and results of operations.*

We will be required to renew permits and approvals in relation to our existing operations and obtain new permits and approvals for any proposed operations as may be required under the applicable laws of the sector or region that we are operating in. There can be no assurance that relevant authorities will renew or issue any of such permits or

approvals in the time-frame anticipated by us or at all. Our failure to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations. Compliance with many of the regulations applicable to our operations may involve incurring significant costs and otherwise may impose restrictions on our operations. We cannot assure you that we will not be subject to any adverse regulatory action in the future. If the interpretation of the regulators and authorities varies from our interpretation, we may be subject to penalties and the business of our Company could be adversely affected. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of the terms and conditions stipulated under any of our licenses or permits, one or several of our licenses and certificates may be suspended or cancelled and we shall not be able to carry on the activities permitted thereunder. For further information, see “Government and Other Approvals” on page 230.

17. *Our funding requirements and the proposed deployment of Net Proceeds are not appraised by any independent agency, which may affect our business and results of operations.*

We intend to utilise the Net Proceeds for the purposes described in “Objects of the Offer” beginning on page 81. Our funding requirements are based on internal management estimates and our current business plans and has not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, other financial condition or business strategies. We have relied on past expenditure in estimating utilisation of the Net Proceeds for our incremental working capital requirements. As a consequence of any increased costs, our actual deployment of funds may be higher than our management estimates and may cause additional burden on our finance plans, as a result of which, our business, financial condition, results of operations and cash flows could be materially and adversely impacted. The deployment of the Net Proceeds will be at the discretion of our Board. Furthermore, in the absence of independent appraisal, or the requirement for us to appoint a monitoring agency in terms of the SEBI ICDR Regulations, we may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control. We may have to revise our expenditure and funding requirements as a result of fluctuations in exchange rates, variations in costs, estimates, quotations or other external factors, which may not be within the control of our management. Accordingly, prospective investors in the Offer will need to rely upon our management’s judgment with respect to the use of proceeds. If we are unable to deploy the proceeds of the Offer in a timely or an efficient manner, it may affect our business and results of operations. Furthermore, we may need to vary the objects of the Offer due to several factors or circumstances including competitive and dynamic market conditions, variation in cost structures, changes in estimates due to delays, which may be beyond our control. Pursuant to Section 27 of the Companies Act, 2013, any variation in the objects of the Offer would require a special resolution of our shareholders, and our Promoter will be required to provide an exit opportunity to our shareholders who do not agree to such variation. If our shareholders exercise such an exit option, our share price may be adversely affected.

18. *Our insurance coverage may not be adequate to cover all losses or liabilities that we may incur in our business and operations.*

Our operations are subject to various risks inherent in the contract manufacturing and distribution of dermatological products, as well as fire, theft, earthquake, flood, acts of terrorism and other events beyond our control. We maintain insurance policies customary for our industry to cover certain risks, including burglary insurance, stock insurance etc, as may be required. For further information, see “Our Business – Insurance” on page 135. Notwithstanding the insurance coverage that we carry, the occurrence of an event that causes losses in excess of the limits specified in our policies, or losses arising from events not covered by insurance policies, could harm our financial condition, business and future results of operations. However, in some cases, we may not have obtained the required insurance coverage or such insurance policies may have lapsed. For instance, we currently do not maintain any insurance against cyber-crime, corporate general liability or key-man insurance. In addition, our insurance policies may not continue to be available on reasonable terms, at economically acceptable premiums, or at all. There can be no assurance that any claims filed will be honoured fully or timely under our insurance policies. Also, our financial condition may be affected to the extent we suffer any loss or damage that is not covered by insurance or which exceeds our insurance coverage.

19. *We rely on third-party transportation providers for procurement of our products and for supply of our products and failure by any of our transportation providers could result in loss in sales.*

We depend on road transportation to procure products from our contract manufacturers and further deliver it to our carrying and forwarding agent, namely M/s. Amderma Healthcare LLP. We rely exclusively on third-party transportation providers for procuring our products as well as for distributing our products to M/s. Amderma

Healthcare LLP. This makes us dependent on various intermediaries such as domestic logistics companies. We cannot guarantee that there will not be any delay in transportation and delivery of our products to our carrying and forwarding agent. Weather-related problems, strikes, or other events could impair our ability to procure products from third party manufactures which may in turn delay the process supplying our products to our carrying and forwarding agent, and this could adversely affect the performance of our business, results of operations and cash flows. Further, our third-party transportation providers do not carry any insurance coverage and therefore, any losses that may arise during the transportation process will have to be borne by our Company. We do not maintain a transit insurance and therefore cannot rely on insurance companies to bear the claim relating to such losses, and consequently, any such loss may adversely affect our business, financial condition, results of operations and cash flows.

20. All of our premises, including our Registered Office and godown are not owned by us and we have only leasehold or leave and license rights over them. In the event we lose such rights, our business, financial condition and results of operations and cash flows could be adversely affected.

All of the premises used by our Company have been obtained on a lease and sub-lease basis, including our Registered Office and godown. Our Company has executed lease/rental agreements for the following properties:

These premises have been taken on a leasehold basis from related parties and third parties. In the event that any lease agreement is not renewed, we will be required to expend time and financial resources to locate suitable land or building to set up our operations. Also, we may be unable to relocate to an appropriate location in a timely manner, or at all, and we cannot assure you that a relocated office will be as commercially viable. If a lease agreement is terminated, prior to its tenure or if it is not renewed, or if we are required to cease business operations at a property, for any reason whatsoever, our business, financial condition and results of operations may be adversely affected. Further, if the vacated property is leased or sold to a competitor, we may also face increased competition in that geographic area, which could adversely affect our market share. For further information on our properties, see “Our Business – Land and Property” on page 140.

21. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

22. We rely extensively on our operational support systems, including on our information technology systems in managing our supply chain, procurement process, logistics and other integral parts of our business, failure of which could adversely affect our business, financial conditions and results of operations.

The importance of information technology systems to our business is paramount. We are reliant on our information technology systems in connection with order booking, procurement of products from contract manufacturers, accounting and distribution. Furthermore, these systems are potentially vulnerable to damage or interruption from a variety of sources, which could result in a material adverse effect on our operations. Disruption or failure of our IT systems could have a material adverse effect on our operations. A large-scale IT malfunction could disrupt our business or lead to disclosure of sensitive company information. Our ability to keep our business operating depends on the proper and efficient operation and functioning of various IT systems, which are susceptible to malfunctions and interruptions (including those due to equipment damage, power outages, computer viruses and a range of other hardware, software and network problems). A significant or large-scale malfunction or interruption of one or more of our IT systems could adversely affect our ability to keep our operations running efficiently and affect product availability, particularly in the country, region or functional area in which the malfunction occurs, and wider or sustained disruption to our business cannot be excluded. In addition, it is possible that a malfunction of our data system security measures could enable unauthorized persons to access sensitive business data, including information relating to our intellectual property or business strategy. Such malfunction or disruptions could cause economic losses. Any failure in our information technology systems could result in business interruption, adversely impacting our reputation and weakening of our competitive position and could have a material adverse effect on our financial condition and results of operations.

23. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

We have experienced negative cash flows in the past which have been set out below:

(₹ in lakhs)

Particulars	For the period ended September 30, 2024	FY 2024	FY 2023	FY 2022
Net cash (used in)/ Generated from operating activities	1,014.63	(305.52)	479.19	301.81
Net cash (used in)/ Generated from investing activities	165.27	(138.73)	(127.35)	(5.85)
Net cash (used in)/ Generated from finance activities	-	(1.50)	(8.60)	-
Net increase/ (decrease) in cash and cash equivalents	1,179.90	(445.75)	343.24	295.96
Cash and Cash Equivalents at the beginning of the period	138.29	584.04	240.80	(55.16)
Cash and Cash Equivalents at the end of period	1,318.19	138.29	584.04	240.80

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources.

Such negative cash flows lead to a net decrease in cash and cash equivalents. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares. For further details, please refer “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 179 and 214, respectively.

24. *There have been instances of delays in filings of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to RoC. There have also been instances wherein incorrect details were filed in certain forms filed by our Company.*

In the past, there have been certain instances of delays in filing statutory forms which have been subsequently filed by payment of an additional fee as specified by RoC. Further, our Company had inadvertently also filed incorrect information in the forms filed with the Registrar of Companies. Our Company has to the extent possible rectified such filings by re-filing such erroneous forms with the RoC.

Our Company undertakes that, in future, the statutory forms required to be filed with RoC are filed in complete compliance of the Companies Act, 2013, in a timely manner. Our Company will take due care to ensure complete compliance with Companies Act, 2013, to the extent applicable, in the future, to avoid repetition of the non-compliances highlighted in this Prospectus.

No show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

25. *We are subject to stringent regulation and any adverse regulatory action may materially adversely affect our financial condition and business operations.*

We are subject to rigorous regulation by numerous other state and central governmental authorities. To varying degrees, each of these authorities monitors and enforces our compliance with laws and regulations governing the development, testing, clinical study, manufacturing, labelling, packaging, marketing and distribution of our products. These laws and regulations are subject to change and to evolving interpretations which could increase costs, prevent or delay future clearance or approvals of our products, or otherwise adversely affect our ability to market our current product portfolio. While there is no requirement to take clearance of manufacturing and distribution of our products as they fall under the derma-cosmetic category and are majorly used for external application. However if there takes place a shift in this practice, the process of obtaining marketing approval or clearance from state and central bodies for new products, or for enhancements or modifications to existing products, could:

- take a significant amount of time;
- require the expenditure of substantial resources;
- involve rigorous pre-clinical and clinical testing, as well as increased post-market surveillance; and
- result in limitations on the indicated uses of our products.

We cannot be assure that upon occurrence of the aforementioned events, the new products or new uses for existing products will be cleared or approved by the state and central regulatory agencies in a timely or cost-effective manner, if cleared or approved at all. The failure to receive approval or clearance for significant new products or modifications to existing products or the receipt of an approval of limited or reduced scope could have a material adverse effect on our financial condition and results of operations.

26. *Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.*

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain end users for our products;
- maintaining high levels of customer satisfaction;
- costs relating to our operations;
- adhering to our high quality and process execution standards;
- pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;

- recruiting, training, and retaining sufficient skilled technical and management personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems;

Also, please refer “*Management's Discussion and Analysis of Financial Condition and Results of Operations*” on page 214 for details on the factors affecting our financial results.

All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

27. *Product liability and other civil claims and costs incurred as a result of product recalls could have a material adverse effect on our business.*

Due to the nature of our business, we face an inherent business risk of exposure to product liability or recall claims in the event that our products fail to perform as expected. Any actual or alleged contamination or deterioration of our products, whether deliberate or accidental, could result in legal liability, damage to our reputation and may adversely affect our business prospects and consequently our financial performance. The risk of contamination or deterioration exists at each stage including during storage, packaging and delivery to our customers for final use/ consumption by consumers. While our Promoter Group entity Amderma Healthcare LLP follows quality control processes, there can be no assurance that our products will not be contaminated or suffer deterioration.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the substandard products and reimburse the cost paid by our customers. Some of the formal agreements executed with our contract manufacturers allow us to initiate legal action against them on account of delivery of sub-standard products, however certain of our formal arrangements bind us to raise quality concerns during a limited period of time post which we are restrained from raising any quality concerns with the manufacturers. In cases where we can raise quality concerns with the contract manufacturers, we may need to litigate our contract manufacturers or litigations may be filed against us for any breach or termination of the contract, such litigation could be time consuming and costly and the outcome cannot be guaranteed. Further, in cases where we cannot initiate legal action against our contract manufacturers, we will have to recall our products and bear the cost of substandard products. We may also have to undertake manufacturing for a fresh batch of substandard products, which may also increase our costs. Such quality lapses could strain our longstanding relationship with our contract manufacturers, distributor and customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations.

As a result of product liability legislation, civil claims may be brought against us. Should any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements, which could increase our expenses and our current liabilities. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims, which could have a material adverse effect on our business, financial condition or results of operations.

28. *If we inadvertently infringe on the patents of others, our business may be adversely affected.*

We operate in an industry characterized by extensive patent litigation, including frivolous litigation by competitors to delay grant of patent. Patent litigation can result in significant damages being awarded and injunctions that could prevent the sale of certain products or require us to pay significant royalties in order to continue to sell such products. While it is not possible to predict the outcome of patent litigation, we believe any adverse result of such litigation could include an injunction preventing us from selling our products or payment of significant damages or royalty, which would affect our ability to sell current or future products or prohibit us from enforcing our rights against others. The occurrence of any of these risks could adversely affect our business, financial condition and results of operations.

29. *We face intense competition and may not be able to keep pace with the rapid technological changes in the dermatological industry.*

The dermatological industry is intensely competitive and is characterized by extensive research and development and rapid technological change. Our customers consider many factors when choosing derma-cosmetic products, including

product reliability, clinical outcomes, breadth of product portfolio, price, product availability and market share can shift as a result of technological innovation and other business factors. Major shifts in industry market share have occurred in connection with product problems, physician advisories and safety alerts, reflecting the importance of product quality in the dermatological industry, and any quality problems with our processes, goods and services could harm our reputation for producing high-quality products and erode our competitive advantage, sales and market share. Our competitors range from small start-up companies to larger companies which have significantly greater resources and broader product offerings than us. In addition, we expect that competition will continue to intensify with increasing price competition as a result of managed care, consolidation among healthcare providers, increased competition. Product introductions or enhancements by competitors which have advanced development technology, better efficacy or lower pricing may make our products or proposed products obsolete or less competitive. As a result, we will be required to devote continued efforts and financial resources to bring our products under development to market, enhance our existing products and develop new products in the dermatological industry. If we fail to develop new products, enhance existing products or compete effectively, our business, financial condition and results of operations will be adversely affected.

30. *We may not be able to maintain our current levels of profitability due to increased costs or reduced trading spreads or margins.*

Our business strategy involves a relatively high level of ongoing interaction with our clients. We believe that this involvement is an important part of developing our relationship with our clients, identifying new cross selling opportunities and monitoring our performance. However, this level of involvement also entails higher levels of costs and also requires a relatively higher gross spread, or margin, on the various products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our traded products were to reduce substantially, which could adversely affect our results of operations.

31. *Our Promoters, Directors, Key Managerial Personnel and Senior Management have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors, Key Managerial Personnel and Senior Management, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Directors, Key Managerial Personnel and Senior Management may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of our Promoters and Other Interests and Disclosures*” in the chapter titled — “*Our Promoters and Promoter Group*” and “*Restated Financial Information*” on pages 163, 174 and 179, respectively of this Prospectus.

There can be no assurance that our Promoters, Directors, Key Managerial Personnel and Senior Management will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

32. *Any adverse change in regulations governing our products and the products of our customers, may adversely impact our business prospects and results of operations.*

Regulatory requirements with respect to our products are subject to change. An adverse change in the regulations governing the development of our products and their usage by our customers may have an adverse impact on our operations. Our Company may be required to alter our development, contract manufacturing and/or distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us. We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for manufacturing and marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could

lead to delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

33. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Offer, our Promoters and members of our Promoter Group will collectively hold not less than 70.65% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

34. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Offer Price.*

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Offer Price which is proposed to be determined through fixed price mechanism. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "*Capital Structure*" on page 70 of this Prospectus.

35. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

36. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of September 30, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — "*Restated Financial Information*" at page 179.

While we believe that all our related party transactions have been conducted on an arm's length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

37. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further, we have not identified any alternate source of financing the 'Objects of the Offer'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. We meet our capital requirements through owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this

Offer or any shortfall in the Offer proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Offer*” beginning on page 81 of this Prospectus.

38. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, our Key Managerial Personnel and our Senior Management. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Senior Management and our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel and Senior Management in the past, however, any attrition of our experienced Key Managerial Personnel and Senior Management, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel and Senior Management who leave. In the event we are unable to motivate and retain our Key Managerial Personnel and Senior Management and thereby lose the services of our highly skilled Key Managerial Personnel and Senior Management may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 158 of this Prospectus.

39. *The availability of look-alikes, counterfeit healthcare products manufactured by other companies and passed off as our products, could adversely affect our goodwill and results of operations.*

We are exposed to the risk that entities in India and elsewhere could pass off their products as ours by imitating our brand name, packaging material and attempting to create counterfeit products, including spurious or pirated products. For example, certain entities could imitate our brand name, packaging material or attempt to create lookalike products. Similarly, we may be unable to protect our trade secrets, including product specifications, which if obtained by counterfeiters, could be used to create products that are substantially similar to ours. This would not only reduce our market share due to replacement of demand for our products, whereby we may not be able to recover our initial development costs or experience loss in revenues but could also harm the reputation of our brands. The measures we take to protect our brands and other intellectual property include relying on Indian laws and initiating legal proceedings, may not be adequate to prevent unauthorised use of them by third parties. Detecting and protecting against the unauthorised use of our products, technology and proprietary rights is expensive, difficult and, in some cases, impossible. The proliferation of unauthorized copies of our products, and the time lost in defending claims and complaints about spurious products could decrease the revenue we receive from our products and have a material adverse effect on our reputation, business, financial condition and results of operations.

40. *Our Company’s management will have flexibility in utilizing the Net Proceeds from the Offer and the deployment of the net proceeds from the Offer is not subject to any monitoring by any independent agency.*

Our Company intends to primarily use the Net Proceeds towards working capital requirement and for general corporate purposes as mentioned in “*Objects of the Offer*” on page 81 of this Prospectus. In terms of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Offer size is not in excess of ₹ 10,000 lakhs. The management of our company will have discretion to use the Net Proceeds from the Offer, and investors will be relying on the judgment of our Company’s management regarding the application of the net proceeds from the Offer. Our company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the shareholders and our Promoters or controlling shareholders will be required to provide an exit opportunity to the Shareholders of our company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI. Accordingly, prospective investors in the Offer will need to rely upon our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for

utilization of net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Offer and our business and financial results may suffer.

41. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “Dividend Policy” on page 178 of this Prospectus.

42. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including termination of our contracts, regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and other professionals, contract manufacturers may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions. While, there have been no instances in the past that would suggest any employee misconduct or errors that are difficult to detect or any such incidences on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

43. *We have not independently verified certain data in this Prospectus.*

We have not independently verified data from the industry and related data contained in this Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

44. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

45. *The Equity Shares have never been publicly traded and the Offer may not result in an active or liquid market for the Equity Shares.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Offer Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

46. There is no guarantee that the Equity Shares offered pursuant to the Offer will be listed on the SME Platform of BSE Limited in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares offered pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited due to delay in submission of required documents/ completion of formalities/compliance with required laws by the issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

47. There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Offer. Our Company, in consultation with the lead manager, will determine the Offer Price. The Offer Price may be higher than the trading price of our Equity Shares following this Offer. As a result, investors may not be able to sell their Equity Shares at or above the Offer Price or at the time that they would like to sell. The trading price of the Equity Shares after the Offer may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

48. The price of the Equity Shares may be highly volatile after the Offer, which could result in substantial losses for investors acquiring the Equity Shares in the Offer.

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Offer as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently. The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;

- performance of our competitors and the perception in the market about investments in the industries in which we operate;
- adverse media reports about us or the industries in which we operate;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

49. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Offer.*

The Equity Shares will be listed on the SME Platform of BSE Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within three (03) working days of the date of closure of the Offer or such other time as may be prescribed by SEBI. SEBI pursuant to its circular bearing reference number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 has reduced the time taken for listing of specified securities after the closure of public issue to 3 working days (T+3 days) as against the previous requirement of 6 working days (T+6 days); 'T' being issue closing date. Our Company shall follow the timeline provided under the aforementioned circular.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Offer will be listed on the Stock Exchanges in a timely manner or at all.

50. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

51. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoters Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and

our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

52. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

53. *Our Company will not receive any proceeds from the Offer for Sale portion.*

The Offer comprises an Offer for Sale aggregating ₹ 1,110.00 lakhs. Our Company will not receive any proceeds of the Offer for Sale portion. The expenses of the Selling Shareholders will, at the outset, be borne by our Company and the Selling Shareholder will reimburse our Company for such expenses (inclusive of taxes) incurred by our Company on behalf of the Selling Shareholders in relation to the Offer in the manner as prescribed under applicable law and in a manner as may be mutually agreed among our Company and the Selling Shareholders. However, in the event that the Offer is withdrawn or not completed for any reason whatsoever, all the Offer related expenses will be borne by our Company, subject to applicable law and except as may be prescribed by the SEBI or any other regulatory authority.

EXTERNAL RISK FACTORS

54. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“GST”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 (“**Finance Act**”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the Personal Data Protection Bill, 2019 (“**PDP Bill**”) was introduced to propose a legal framework governing the processing of personal data. However, the PDP Bill has been withdrawn on August 3, 2022 and the Ministry of Electronics and Information Technology, Government of India (“**MoEIT**”) has submitted a new Digital Personal Data Protection Bill, 2022 before the Parliament.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

55. *Our business is substantially affected by prevailing economic conditions in India.*

We perform all of our activities in India, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries; and
- prevailing national, regional or global economic conditions, including in India's principal export markets.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the industries in which we operate.

56. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

57. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

58. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

59. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

60. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall

or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

61. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The Company in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. Funding working capital requirements of our Company

We are a derma-cosmetic development company having core focus on development of problem solving dermatological, cosmeceutical and aesthetical products, and therefore to direct all our efforts towards product formulation and development, we outsource key functions such as manufacturing, prototype development and distribution to third parties, for effective management and execution. We are currently present in Karnataka, Andhra Pradesh and Telangana. Our Company has created a structured storage and distribution chain through one of its promoter group entities, namely, M/s. Amderma Healthcare LLP ("**Amderma**"), which was established under the guidance of Tarun Gandhi. Our Company has entered into a carrying and forwarding agreement dated May 15, 2024 which was effective from January 1, 2024, with Amderma, for the purpose of appointing Amderma as a carrying and forwarding agent ("**CF Agreement**"). Under this arrangement, we sell all of our products to Amderma for the purpose of storing, delivering and distributing the same in the regions that we operate. In accordance with the CF Agreement, our Company upon receiving an order from wholesalers, doctors, hospitals, nursing homes, etc., passes on the order for execution to Amderma, by selling all our products to Amderma. Amderma records the order in its books of accounts and thereafter executes it on our behalf. Accordingly, we derive all of our revenue from M/s. Amderma Healthcare LLP. We have engaged Amderma as a carrying and forwarding agent, to outsource order execution and product distribution in order to consolidate all our efforts and resources towards product development and formulation.

Therefore, our business is working capital intensive in nature, and currently, we fund a majority of our working capital requirements in the ordinary course of business from our internal accruals. Our Company requires additional working capital for funding its incremental working capital requirements. We propose to utilize ₹ 2,500 lakhs from the Net Proceeds to fund the working capital requirements of our Company in the Financial Year 2026.

(d) Key justifications for holding period levels

Particulars	Justification
Inventories	Our inventory days, which represent the number of days our inventory is held, was 95 days in Fiscal 2022 as our company was in its early stage of growth. However, from Fiscal 2023 onwards, our inventory days have shown a gradual decrease i.e. 105 days, 56 days and 21 days for Fiscal 2023, Fiscal 2024 and for the period ended September 30, 2024 respectively. We expect our inventory days to be 25 days and 40 days for Fiscal 2025 and Fiscal 2026, respectively. There is a decrease in inventory holding days for the Fiscal 2024 which is due to effective management of inventory so as to reduce the working capital requirement. Also, we have estimated further decrease in our inventory holding days in Fiscal 2025 and Fiscal 2026 which is due to our organisation's aim to maintain optimum level of inventory by efficient forecasting.
Trade Receivables	Over the past three fiscal years, we have observed decrease in our trade receivables days. In Fiscal 2022, our trade receivables days were 35 days, which decreased to 13 days in Fiscal 2023. However, our trade receivables days were 87 days and 97 days in Fiscal 2024 and for the period ended September 30, 2024 respectively. We expect our trade receivables days to be 79 days and 70 days for Fiscal 2025 and Fiscal 2026, respectively. This trend is primarily driven by the characteristics of C&F agency, which predominantly helps the company in Handling and Distributing its products to the Customers. The increase of days from Fiscal 2024 onwards is due to the company's vision to explore new territories such as West Bengal and Odisha, hence prolonged credit period is a result of the trust and long-term relationships we foresee to maintain with C&F and CSA Agencies. As a result, our trade receivable days are in alignment with industry norms and the necessity to accommodate the payment practices in our customer base.
Trade Payables	During Fiscal 2022, our trade payable days was 156 days as the company was in its early stage of building the promising relationship with its suppliers. Subsequently our trade payables days have decreased to 153 days, 23 days and 22 days in Fiscal 2023, Fiscal 2024 and for the period ended September 30, 2024 respectively. We expect to increase our trade payables days to 30 days and 45 days in Fiscal 2025 and Fiscal 2026, respectively. The reduction in days from Fiscal 2022 onwards, is indicative of our efficient management of payables and underscores our commitment to optimizing cash flows. The decrease from Fiscal 2024 was primarily due to insertion of new Income Tax regulation section 43B(h), which states that all the payments to MSME units shall be made within 45 days from due date. As majorly our suppliers are registered as Micro and Small scale entity under MSME Act, 2006, our organisation aims for timely payment practices and efficient utilization of working capital.

SECTION V – ABOUT THE COMPANY

INDUSTRY OVERVIEW

GLOBAL ECONOMY

More than three years after the global economy suffered the largest shock of the past 75 years, the wounds are still healing, amid widening growth divergences across regions. After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia's war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events. Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of pre-pandemic (January 2020) projections, especially in emerging market and developing economies.

The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its pre-pandemic path. The euro area has recovered, though less strongly—with output still 2.2 percent below pre-pandemic projections, reflecting greater exposure to the war in Ukraine and the associated adverse terms-of-trade shock, as well as a spike in imported energy prices. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with pre-pandemic predictions. Other emerging market and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent. Higher interest rates and depreciated currencies have exacerbated the difficulties of low-income countries, placing more than half either at high risk of distress or already in distress. Overall, global output for 2023 is estimated at 3.4 percent (or about \$3.6 trillion in 2023 prices) below pre-pandemic projections. Private consumption has also recovered faster in advanced economies than in emerging market and developing economies, owing to an earlier reopening in the former group facilitated by greater availability of effective vaccines, stronger safety nets, more ample policy stimulus, and greater feasibility of remote work. These factors supported livelihoods during the pandemic, and household consumption is now broadly back to pre-pandemic trends. Among advanced economies, private consumption has been stronger in the United States than in the euro area, with households receiving larger fiscal transfers early in the pandemic and spending the associated savings more quickly; being better insulated from the rise in energy prices resulting from the war in Ukraine; and feeling relatively confident amid historically tight US labor markets, which have supported real disposable incomes.

Among emerging market and developing economies, the consumption shortfall is particularly large in China, reflecting tight restrictions on mobility during the COVID-19 crisis. Divergences in labour market performance across regions broadly mirror those for output and consumption. Employment and labour participation rates are estimated to exceed prepandemic trends in advanced economies but to remain significantly below them in emerging market and developing economies, reflecting more severe output losses and much weaker social protection. Countries that had the most limited fiscal space are also those where employment shortfalls are the largest (ILO 2023). Among advanced economies, the euro area has seen larger employment gains than the United States. This may reflect more extensive use in the former of worker-retention programs modelled on the German Kurzarbeit short-time work scheme (IMF 2020), which protect workers' income and allow businesses to retain firm-specific human capital, reducing the costly process of separation, rehiring, and training. In the euro area, these programs bolstered employment during the most challenging phases of the crisis and accelerated the recovery when economies reopened.

Investment, on the other hand, has uniformly fallen short of pre-pandemic trends across regions. Businesses have shown less enthusiasm for expansion and risk taking amid rising interest rates, withdrawal of fiscal support, dimmer prospects for product demand, stricter lending conditions, and growing uncertainties regarding geoeconomic fragmentation. Higher leverage has further dampened investment which remains 3 percent to 10 percent lower across regions than had been projected before the pandemic. Moreover, the pandemic, war in Ukraine, and worsening climate shocks have contributed to a reversal in decades-long poverty reduction trends. According to World Bank staff estimates, 75 million to 95 million more people were living in extreme poverty in 2022 compared with pre-pandemic estimates. Spikes in food prices and related insecurities following Russia's invasion of Ukraine, as well as bouts of extreme weather, have accentuated these difficulties. The global average temperature in July 2023 was the highest on record for any month, amid reports of catastrophic flooding, heat waves, and wildfires in many regions. Overall, the global prevalence of undernourishment is significantly higher than before the pandemic.

OVERVIEW OF THE INDIAN ECONOMY

India continues to show resilience against the backdrop of a challenging global environment, according to World Bank's latest India Development Update (IDU). The IDU, the Bank's flagship half yearly report on the Indian economy, observes that despite significant global challenges, India was one of the fastest-growing major economies in FY22/23 at 7.2%. India's growth rate was the second highest among G20 countries and almost twice the average for emerging market economies. This resilience was underpinned by robust domestic demand, strong public infrastructure investment and a strengthening financial sector. Bank credit growth increased to 15.8% in the first quarter of FY23/24 compared with 13.3% in the first quarter of FY22-23.

The World Bank forecasts India's GDP growth for FY23-24 to be at 6.3%. The expected moderation is mainly due to challenging external conditions and waning pent-up demand. However, service sector activity is expected to remain strong with growth of 7.4% and investment growth is also projected to remain robust at 8.9%.

"Tapping public spending that crowds in more private investments will create more favourable conditions for India to seize global opportunities in the future and thus achieve higher growth." - Auguste Tano Kouame, World Bank's Country Director in India.

"While the spike in headline inflation may temporarily constrain consumption, we project a moderation. Overall conditions will remain conducive for private investment," said Dhruv Sharma, Senior Economist, World Bank, and lead author of the report. *"The volume of foreign direct investment is also likely to grow in India as rebalancing of the global value chain continues."*

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of the COVID-19 pandemic shock. Real GDP in the first quarter of 2022-23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second-highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GLOBAL DERMOCOSMETIC PRODUCT MARKET

The Global Dermocosmetic market showcased growth at a CAGR of 4.18% during 2020-2023. The market was valued at USD 67.42 Billion in 2023 which is expected to reach USD 108.94 Billion in 2030. The market for dermocosmetics has been growing rapidly in recent years, driven by increasing consumer awareness of skincare and beauty, advancements in skincare technology, and a growing aging population seeking anti-aging solutions.

This report provides a complete analysis for the historical period of 2020-2023, estimates of 2024 and the forecast period of 2025-2030. The report analyses the Dermocosmetic Market by Region (Americas, Europe, Asia Pacific, Middle East & Africa) and 10 Countries (United States, Canada, United Kingdom, Germany, France, Italy, Spain, China, Japan, South Korea).

According to epidemiologic studies, out of every 10 people, one will have eczema sometime in their life more likely to develop the condition as a child, around 9.6 million kids under the age of 18 in the U.S. have eczema. A third of these children have moderate to very bad forms of the condition. The rising incidence of skin disorders such as acne, eczema, psoriasis, rosacea, and hyperpigmentation contributes to the demand for dermatologist-recommended dermocosmetic products. Consumers seek effective solutions to manage and alleviate symptoms associated with these conditions. The

growing prevalence of skin disorders expands the addressable market for dermocosmetics tailored to treat specific dermatological concerns. Brands that offer clinically proven solutions for common skin conditions gain consumer trust and loyalty, driving market growth in this segment.

Urbanization brings about higher levels of pollution, including air pollution, UV radiation, heavy metals, and particulate matter. These environmental stressors have detrimental effects on the skin, leading to issues such as premature aging, dullness, dehydration, and exacerbation of skin conditions like acne and eczema. As urban populations are increasingly exposed to these pollutants, there is a growing demand for skincare products that offer protection against environmental aggressors and help repair and strengthen the skin barrier.

Bioengineering and biotechnology techniques involve the use of living organisms or biological processes to produce skincare ingredients or develop novel formulations. This includes techniques such as fermentation, genetic engineering, and cell culture technology. Bioengineered and biotechnologically derived ingredients offer several benefits, including enhanced purity, stability, and efficacy. These advanced ingredients mimic natural skin components more closely, leading to improved compatibility and performance in dermocosmetic formulations.

Online platforms offer virtual consultations and skincare assessments conducted by skincare experts, dermatologists, or AI-powered chatbots. These consultations involve analyzing skin type, identifying concerns, and recommending personalized skincare regimens or product recommendations. Virtual consultations provide consumers with professional guidance and personalized skincare advice without the need for in-person appointments. Brands leverage technology to offer virtual skincare assessments through interactive quizzes, skin analysis tools, and AI algorithms, fostering consumer trust and loyalty while driving sales of recommended products.

Dermatology clinics, spas, and salons integrate product retailing into their practice by offering a curated selection of dermocosmetic products for sale to patients and clients. Retail areas within clinics and spa lounges showcase skincare products recommended by skincare professionals and aligned with treatment protocols. Integrated product retailing enables patients and clients to conveniently purchase dermocosmetic products recommended by skincare professionals immediately after treatments or consultations. By providing access to professional-grade products, clinics, spas, and salons enhance patient/client compliance, satisfaction, and loyalty while generating additional revenue streams.

INDIA COSMETIC MARKET

India's \$14 billion beauty and personal care industry is on a roll thanks to online sales of beauty products, premiumisation, and an inclination towards organic and ethical brands. According to a report by research firm Euromonitor International, last year, with the presence of online retailers like Nykaa.com and Amazon.com, the beauty and personal care products category crossed \$400 million in internet sales up from \$100 million in 2014.

The high penetration of smartphones and easy access to the internet that exists on the fingertips of 560 million Indians (TRAI data for September 2018) today is driving the continued rise of the beauty and personal care industry in the country. With the number of internet users in the country expected to cross Europe's population by 2025, it is no surprise that the beauty and personal care industry is enjoying rapid growth, accelerated by an increase in internet retailing.

According to the Euromonitor International report, since technology has been driving growth in most industries, including beauty and personal care, companies are rethinking the relevance of physical stores and revamping them. Businesses are developing ways to drive engagement as well as TO transform the in-store experience for consumers. "Physical stores continue to remain relevant in India with retailers focusing on enhancing the shopping experience by housing beauty studios with personalized beauty advisors who help consumers understand latest and trending make-up looks and regimes," the report said.

Internet connectivity has also caused a shift in consumers' traditional power structures, wherein recommendations from families and friends and independent consumer reviews have greater credence over mass marketing channels like celebrity endorsements, in-store advertising etc, according to the Euromonitor International Lifestyles Survey 2019.

Premiumisation, which essentially refers to the ability and willingness to spend on exclusive, superior quality goods, is of late becoming more popular with the Indian consumer. Indians are no longer afraid to put up extra bucks to purchase premium products. Such products come largely in partnership with a luxury or premium brand, like the lipstick launched by L'Oreal in collaboration with Indian couture designer Sabyasachi, or products personally formulated or customised in

accordance to the specific needs of customers. Companies like Freshistry and Emcee Beauties produce customised products taking the needs of their customers into consideration, Euromonitor said.

Premiumisation has especially driven the demand for beauty and personal care products. The Euromonitor International study shows that in 2018, \$774 million worth of premium beauty and personal care products were sold in India, with 63% share enjoyed by premium fragrances and hair care products. According to the study, with increasing disposable incomes, the per capita expenditure on premium personal care and beauty products is expected to show a CAGR of 15% from 2018 to 2023.

Meaningful consumerism has also been shaping the beauty and personal care industry as customer focus shifts towards conscious consumption and ethical living.

With India having 22 of the world's 30 most polluted cities (2018 air quality data by Greenpeace), consumers are becoming increasingly aware of environmental degradation and switching to eco-friendly, organic AND , natural products. The Euromonitor International Lifestyles Survey (2019) shows that respondents have the greatest understanding of, and trust in(,) environmentally conscious and eco-friendly products (67%), followed by natural products (66%), and organic products (65%). Brands like SoulTree offer certified natural beauty and personal care products, while Ruby's Organic offers organically made cosmetics. Many other companies are looking into creating recyclable products, or products that are free of any artificial ingredients.

Over the last decade, India has seen consistent growth in the personal care and cosmetics market with increasing shelf space in boutiques and retail stores across the country. Many multinational brands have entered the Indian market, primarily aided by dedicated support structure and their respective pricing strategies. The Indian cosmetics industry is majorly categorised into skin care, hair care, oral care, fragrances, and colour cosmetics segments. The overall market share is expected to grow to US\$ 20 billion by 2025 with a Compound Annual Growth Rate (CAGR) of 25%. On the other hand, the global cosmetics industry is growing at 4.3% CAGR and will reach US\$ 450 billion by 2025.

By 2025, along with this growth, India will constitute 5% of the total cosmetics market and reach the top five global markets in terms of revenue. Additionally, the market will continue to rise strongly due to consumers' growing choice of speciality cosmetic products such as organic, herbal, and ayurvedic items. Colour cosmetics, perfumes, specialised skin care, hair care, and makeup cosmetics are the main industries predicted to increase. The market competition for domestic brands is increasing due to a growing number of international companies entering the Indian personal care and cosmetics market. However, the bigger players in the industry like Dabur and Marico continue to dominate the market due to the availability of ayurvedic and herbal cosmetic products in their respective product portfolios. Due to the widespread belief among customers that foreign brands are of higher quality; international cosmetics brands have had a significant impact on the Indian market. Aspirational customers have been drawn to these brands, which have accelerated the growth of the Indian market. Indian customers are switching from basic functional products to more sophisticated and specialised cosmetic products, which is driving up demand for high-end goods in India.

Many international brands like Revlon, Avon, Burberry, Calvin Klein, Cartier, Christian Dior, Estee Lauder, Elizabeth Arden, Lancome, Chambor, Coty, L'Oreal, Oriflame, Yardley, Wella, Schwarzkopf, Escada, Nina, Ricci, Rochas, Yves St. Laurent, Tommy Hilfiger, Max factor, Max Mara, Shiseido, Body Shop, Maybelline New York, MAC and many more like these have been present in India for quite some time now.

The Indian beauty market continues to be one of the fastest-growing ones in the entire world. India is one of the most attractive countries for multinational corporations aiming to increase their market share, with a population of over a billion people and rising disposable income.

Indian businesses looking to access this market still face difficulties, notwithstanding this development. For instance, the Indian beauty sector has undergone a substantial amount of consolidation in recent years as huge global businesses have tried to tap into the lucrative market. This has led to a more competitive environment where many smaller competitors struggle to stay competitive and maintain business growth.

Fragrance: Perfumes and deodorants make up the two divisions that make up the fragrance market. In terms of production, consumption, and imports, India has one of the largest fragrance markets, and it is currently expanding as more young people use perfumes and deodorants. The Indian Perfumes and Deodorants market stood at US\$ 368 million in 2022 and is projected to surpass US\$ 473 million by 2026 growing at a CAGR of over 6.4%. Some of the leading fragrance brands operating in the Indian market are Fogg, Beiersdorf, ITC, Raymond Group, Unilever Group, McNROE, Vanesa Care Pvt., etc. Recently, there has been an increase in the localization of production in this area. A rise in the demand for high-end luxury perfumes in the Indian market, made possible by the expansion of e-commerce channels, has supplemented this.

Colour Cosmetics: According to its goods, the colour cosmetics market is divided into four major categories: eye makeup, facial makeup, lip products, and nail products. As people become more mindful of their appearance and social media serves as an interface for global beauty trends, the market for colour cosmetics is only anticipated to rise in the coming years. Major players in the colour cosmetics industry include Hindustan Unilever Limited (HUL), Lakme, Elle 18, Toni and Guy, etc.

Oral Care: The oral care market in India is divided into five categories, including toothpaste, toothbrushes, toothpowder, mouthwash, and additional oral care goods including dental floss and chewing gum. In India, the Oral Care segment generated revenues of over US\$ 1.78 billion in 2022, and the market is expected to grow at a CAGR of 4.5% between 2022-26 to reach US\$ 2.13 billion by FY26. Some major players dominating India's oral care market are Colgate Palmolive, Hindustan Unilever Ltd., GlaxoSmithKline Consumer Healthcare Ltd., Johnson & Johnson, etc.

FUTURE GROWTH OF THE COSMETIC INDUSTRY IN INDIA

One of the sectors with the highest growth in India is the beauty industry, which is predicted to continue expanding in the years to come. Manufacturing and distributing cosmetics, beauty items, appliances, and services are all included in this industry. As more people use the potential of the beauty industry in their daily routine for skincare and haircare instead of visiting doctors or taking medications, the beauty sector is no longer just about beauty and make-up; it is also threatening the treatment solution industry.

India's beauty, cosmetics and grooming market will reach US\$ 20 billion by 2025. The market share of organised and unorganised will be 44:55 by 2025 from the existing ratio of 25:75.

The beauty industry in India will experience growth in the upcoming years. The passion for skincare and beauty among Generation Z has over time changed this business. With full access to social media to communicate their demands and obtain the goods and services they want; Gen Z is significantly more demanding in terms of goods and services. This is making it more difficult for all the beauty brands to compete and succeed. The COVID era has seen the industry shifting from offline stores to online sites leading to discontinuation of the premium products. Offering customised products could assist businesses in drawing in more clients because consumers are more likely to buy from companies that will meet their needs and supply goods that match their preferences. Customers frequently favour firms that can deliver the same services to them at home or that can create products specifically for them.

Natural and organic cosmetics are the main emphasis of India's cosmetics business going forward. It demonstrates a greater understanding of the negative skin damaging consequences of cosmetics based on chemicals. India is blessed with natural cosmetics; thus, it is commendable that this age is gravitating towards them. The cosmetics sector in India has changed dramatically in recent years. It is quite amazing how quickly a market can develop into one of the most active cosmetic industries in the world. The Indian cosmetics sector is poised to surpass even more amazing milestones in the future with a compound annual growth rate (CAGR) that constantly exceeds averages for the rest of the world.

The shifting consumer landscape is one of the most compelling forces behind this expansion. More so than ever before, Indians are discriminating and quality conscious. The market for cosmetics is expanding as disposable incomes grow and urbanisation quickens. Players in the industry, both established and new, will benefit greatly from this growth. The landscape of the cosmetic industry has changed significantly because of the digital revolution. Consumers throughout the country now have easy access to various products thanks to e-commerce platforms. Anyone with an internet connection may now shop for cosmetics with unparalleled ease, from crowded cities to far-flung villages.

Additionally, firms are now able to connect deeply with their target demographic owing to digital marketing methods. Particularly social media has developed into a potent tool for firms to engage and communicate with consumers. As technology develops and the internet becomes more widely used in India, this trend is expected to intensify.

THE ROAD AHEAD

The cosmetic industry in India has emerged as a luminous gem in the country's economic landscape. The Indian cosmetic industry has embarked on a stellar trajectory, defying conventional norms and products with a stable market value of over US\$ 3 billion. These items show the highest level of resistance to the pandemic epidemic, the financial hardships brought on by domestic limitations, and months of a blockade. The categories most impacted by social interaction and living away from home were makeup products that block sunlight, as well as fragrances. This growth can be attributed to several key

factors. Chief among them is the changing consumer landscape in India. As incomes rise and urbanization spreads its wings, Indian consumers are increasingly discerning and quality-conscious. The demand for cosmetics and personal care products is on the rise, and this trend is set to continue in the coming years. Both established firms and newbies have a wealth of potential in the Indian cosmetics market. The growth of product portfolios is one of the most promising options. A growing demand for niche and specialised items is being driven by increasingly sophisticated consumers. Companies have a fantastic potential to diversify and meet certain customer needs because of this. Additionally, India's vibrant cultural legacy is inextricably related to the country's beauty and wellness sector, of which cosmetics are a crucial component. The ancient Indian system of healing and wellness known as Ayurveda is increasingly being used in cosmetics. This blending of age-old knowledge and cutting-edge science not only opens new avenues for innovation but also appeals to consumers who are concerned about their health all around the world. The digital revolution has also paved the way for unprecedented opportunities. E-commerce platforms have democratized access to cosmetics, reaching customers in every nook and cranny of the country. This expansive reach allows companies, big and small, to tap into previously untapped markets.

Case Studies

Brief case studies of problem solving products developed by our Company since incorporation have been provided below:

Case Study 1:

Problem:

A moisturizer can be helpful any time when skin feels dry, such as during the winter. When the skin becomes dry, the body makes more oil. The extra oil can clog one's pores, which may lead to more breakouts. The right moisturizer can prevent one's skin from becoming dry and irritated.

Conventionally a regular moisturizer is formulated in oil vehicle so as to prevent dryness, but when used on face due to its high oil content it may clog the pores and results in breakouts/acne. Hence a moisturizer which has to be applied for face should be formulated with ingredients which are natural, non-comedogenic, light in weight and non-greasy to prevent breakouts.

Face moisturizers are like the icing on the cake of a skincare routine. They are the finishing touch that keeps all the other actives in, seals in moisture and protects the skin by keeping nasties like pollution out. The invisible barrier that they provide on skin also protects from the wind, rain and cold weather that can be ageing and irritating to skin. So, they are incredibly anti-ageing by keeping skin hydrated and conditioned, plus preventing damage to the skin from the weather.

Solution:

As a solution we have formulated a non-comedogenic face moisturizer for acne-prone skin, which moisturizes the face and keeps acne & pimples away. It goes deep within pores to remove excess oil. Its oil repellent formula closes pores & hydrates skin effectively for a longer time.

cream formulated by our company contain ingredients which likely offers the following benefits:

- Hydration and moisturization on the skin
- Improvement of skin barrier function
- Soothing and calming effects
- Antioxidant protection against environmental damage
- Potential anti-ageing effects, such as reducing the appearance of fine lines and wrinkles

Overall, this combination of ingredients in our product is designed to nourish, hydrate, and protect the skin, making it suitable for looking to maintain healthy and moisturized skin. It contains a special blend of intense natural actives and plant ingredients.

Case Study 2: Moisturising Lotion

Problem: Daily moisturizing of the skin is vital for healthy skin, yet some think of it as an aesthetically-inclined habit. The most important times to use moisturizer are after a bath, shave or exfoliation. For some, this might be twice a day. Moisturizing after a shower is very important because hot water strips all the moisture and oils out of one's skin, leaving it parched and dry. While hot water may be relaxing, it also wreaks havoc on the skin. The skin on the face, ears, neck and chest are very sensitive to environmental changes and are the most frequent areas of the body known to develop skin cancer. These areas of skin also shed cells more rapidly than other parts of the body.

Solution: Our company has formulated XL-Aqua moisturising lotion which allows for younger skin cells to rise to the surface and massaging the lotion onto the skin helps stimulate blood circulation and new cell generation. The XL-Aqua moisturising lotion contains key ingredients namely 'colloidal oatmeal, shea butter, aloe vera extract, jojoba oil, sunflower oil, sodium gluconate, coconut oil' which benefits our skin as below:

- The Ingredients in the body lotion help solving problems like dry and sensitive skin, xerosis and ichthyosis, atopic dermatitis, eczema and skin barrier disorders;

- It helps to soften and soothe uncomfortable skin.
- It can also help minimize wrinkles, particularly in exposed areas such as chest, and calm flare-ups or irritated patches
- It supports the skin barrier, the skin's front line of defense against microbial invasion that can be stripped by cleansing. Nourishing ingredients in body lotions can restore the skin barrier's natural defenses and help keep the skin's microbiome balanced and healthy.

Case Study 3: *DEPIMED* Ultra Cream

Problem: Melasma is a chronic skin disorder with numerous aetiology including sun exposure and geographic environment, genetic predisposition, and also drug-induced and disease-induced hyper-pigmentary skin disorders. Although various therapeutic modality including systemic and topical pharmacological and procedural treatments are commonly available for melasma management, however, many of these treatments showed limited clinical response and accompany numerous unwanted adverse drug reactions. Moreover, due to the nature of melasma and other hyper-pigmentary skin disorders, relapse and recurrence after therapy discontinuation is very common. Numerous factors have been considered in melasma aetiology. In this regard, genetic predisposition and gene polymorphisms, sun exposure and UV radiation, hormonal changes, underlying disorders including thyroid disorders, pregnancy, and also drug-induced melasma have critical roles in melasma induction.

Solution: The design and development of efficient topical therapeutic agents would be promising in melasma management not only to induce optimum clinical response, but also avoid unwanted adverse drug reactions and relapse through the enhance in water solubility, increase the skin permeability, augment the photostability, and improve the dermal bioavailability of the loaded drugs.

This led our Company to develop *DEPIMED* Ultra Cream which contains key ingredients like '4 butyl resorcinol, niacinamide, glycolic acid 70%, kojic acid di-palmitate, alpha arbutin, tetrahydro diferuloylmethane, licorice extract, mulberry extract, vit e – acetate' which are considered as topical depigmenting agents in melasma management.

Our Depimed Ultra Cream targets skin concerns like hyper-pigmentation, melasma, uneven skin tone. Ingredients used in our Product has following benefits:

- **4-Butylresorcinol** is a chemical which treats hyperpigmentation of the epidermis.
- **Niacinamide** addresses this concern by breaking down existing melanin and preventing further deposits. Its dual-action approach makes it a formidable solution for combating dark spots and visible signs of environmental damage.
- **Octyl methoxycinnamate (OMC)** absorbs UV (ultraviolet) rays from the sun and protects the skin from sun damage, it also lightens dark spots on the skin and protects from the harmful effects of UV rays.
- **Glycolic acid** reduces the appearance of fine lines and wrinkles by exfoliating the top layer of the skin. This, in turn, accelerates skin cell renewal, increases collagen production, and maintains the skin's natural ability to retain hydration while preventing and reducing fine lines and wrinkles when used regularly.
- **Kojic acid** is revered for its use as a skin-lightening ingredient all over the world. It significantly reduces dark spots and hyper-pigmentation and is a safer alternative to hydroquinone. Hydroquinone is a topical depigmenting agent which is the most commonly used therapeutic option in melasma management.
- **Alpha arbutin** is a naturally occurring skin-brightening agent that inhibits the secretion of melanin (skin pigment), thus making it a great skin brightener.
- **Tetrahydro diferuloylmethane** extracted from turmeric and has a very high purity, high efficiency to reduce the pigmentation process of the skin and is also effective in anti-oxidants 3X higher than Vitamin C in the same amount, making it superior to general whitening substances that do not have an independent anti-inflammatory effect.
- **Licorice root extract** can help prevent damage and keep the skin looking youthful and radiant by neutralizing free radicals.
- **Mulberry extract** has potential antioxidant properties. It may help in reducing the appearance of scars, keeps the skin smooth and young, and reduces age spots due to these antioxidant properties.
- **Vitamin E** is fat-soluble antioxidant and It protects the skin from various deleterious effects due to solar radiation by acting as a free-radical scavenger. Vitamin E has photo protective properties.

Case Study 4: Ultra Kromaglo Effervescent Tablets

Problem: Melasma is a common acquired disorder of hyper-pigmentation that is characterized by irregular light to dark brown patches on the forehead, cheeks, upper lip, and chin areas of the face. Prevalence rates vary from 1% to 50% in high-risk populations include individuals with darker skin types, pregnant women, and those residing in global locations with intense ultraviolet (UV) exposure.

Solution: The treatment of melasma should include a multimodality approach that incorporates photo protective agents, antioxidant treatments, skin lighteners, exfoliants, and resurfacing procedures, as needed. One such approach is oral glutathione supplement. Absorption of glutathione in conventional tablet/ capsule form is hampered and needs a novel formulation which has better absorption and bioavailability of drug when taken orally. Hence our Company formulated **Ultra Kromaglo Effervescent** Tabs with the key ingredients which include ‘glutathione 500 mg (reduced), vitamin c 30mg, hyaluronic acid 30 mg, grape seed extract 10mg, vitamin-e 5 mg’. Effervescent tablet offers several advantages over traditional tablets formulations like convenient, improved stability, Enhanced Palatability, Portability, Versatility, Fast-acting, and Precise Dosage form that can improve patient compliance and satisfaction for a variety of medications and supplements.

The advantages of Ultra Kromaglo Effervescent Tablets includes:

- Helps inhibit Melanin production
- Helps promote Pheomelanin synthesis which leads to a luminous and clear complexion
- Helps give skin radiance and even tone
- Helps protect skin cells from UV damage

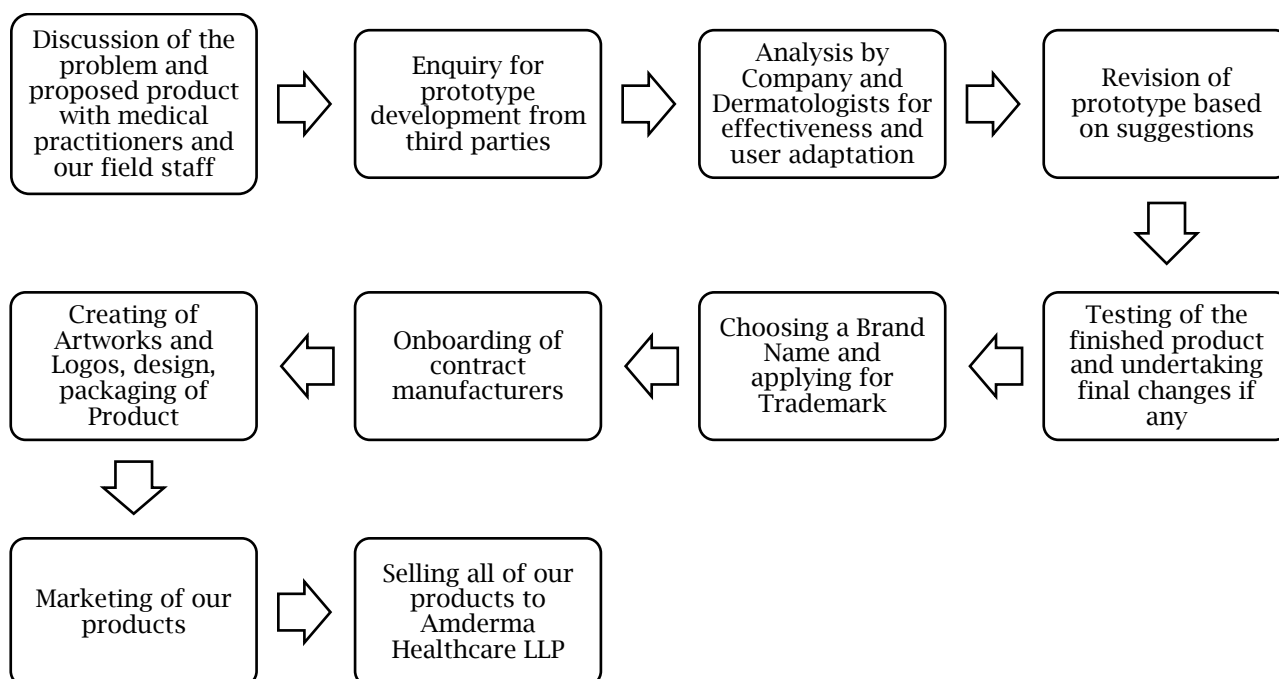

Benefits of the Ingredients used:

- **Glutathione:** Glutathione is a thiol peptide that exerts anti-oxidant action by scavenging the UV induced free oxygen radicals. It inhibits tyrosinase enzyme directly by binding to the copper binding sites of the enzyme and indirectly by its anti-oxidative effect by clearing the free radicals and peroxides. It is used in both oral and intravenous forms. Orally it is used in the dosage of 500 mg daily for the treatment of melasma.
- **Vitamin C:** Vitamins C helps ensures better absorption of Glutathione and gives better results.
- **Vitamin-E:** Helps enhance body’s defenses, it has anti-inflammatory properties, helps in skin repair, helps reduce scars, burns, dark spots and fights free radicals such as pollution, UV damage and stress.
- **Hyaluronic Acid:** Is a naturally occurring substance found in the skin that helps retain moisture, keeping the skin hydrated and plump.

Grape Seed Extract: Grape seed extract offers a range of potential benefits for skin health, from antioxidant protection and collagen support to anti-inflammatory effects and wound healing properties.

Asset-light business model.

We have adopted what we believe to be a scalable, asset-light and less capital-intensive business outsourcing model, wherein we have outsourced our key business operations, including manufacturing, prototype development, testing and distribution to third parties. We believe that this asset light business model, enables us to direct all our efforts towards product formulation, product development, marketing and sales. Further, while we focus on product development, by outsourcing key business functions we believe that we have created mutually advantageous partnerships that allow all parties to focus and manage the capabilities they are best at, in a business's ecosystem. We have outsourced our manufacturing operations to third party manufacturers, which enables us in providing quality products to our customers, without having to invest in a large amount of fixed assets and thereby reduces our recurring expenses relating to labour cost, raw material cost, manufacturing unit costs, *etc.* Further, our formal agreements bind our manufacturers to provide quality products and holds them personally liable, in the event they fail to do so. Our prototype developers and contract manufacturers also enable us in receiving quality development and tested products and reduces the costs, which we would have incurred to maintain expensive testing and development equipment and personnel. The storage and distribution function of our Company has been outsourced to our Promoter Group entity, M/s. Amderma Healthcare LLP (“**Amderma**”). Through Amderma, our Company executes the orders received for our products and ensures that the stock is maintained and insured in a proper manner. This reduces the direct responsibility and storage and distribution costs of our Company and enables us to focus on product development, product formulation, marketing and sales. We believe that through our asset light model, we have significantly reduced our cost of investment and running our business, by outsourcing key responsibilities and functions and thereby have achieved greater flexibility to scale up our business faster than other asset-heavy companies. This quick scalability gives us a definite edge over other manufacturers in the market.

2.1 Basis of preparation of Restated Financial Statements

The Restated Financial Statements are prepared in accordance with Indian Generally Accepted Accounting Principles (“GAAP”) under the historical cost convention on the accrual basis. GAAP comprises of accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 as amended from time to time and the Companies Act, 2013.

These Statements have been prepared specifically for the purpose inclusion in the Red Herring Prospectus (“RHP”) and the Prospectus (Prospectus and together with RHP, the “Issue Documents”) to be filed with the SME platform of BSE limited (“BSE SME”) (“the Stock Exchange”) and Registrar of Companies (ROC), Karnataka at Bangalore in connection with proposed Initial Public Offer of equity shares of face value of Rs. 10 each (“Issue”), in accordance with requirements of:

- a. Section 26 of Part I of Chapter III of the Companies Act, 2013;
- b. Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended (the “SEBI ICDR Regulations”) as issued by the Securities and Exchange Board of India (“SEBI”) on 11th September 2018 as amended from time to time; and
- c. Guidance Note on Reports in Company Prospectus (Revised 2019) as issued by the Institute of Chartered Accountants of India (“ICAI”)

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

2.2 Presentation and disclosure of Restated Financial Statements

All assets and liabilities have been classified as current & non-current as per Company’s normal operating cycle and other criteria set out the Schedule III of the Companies Act, 2013.

As of the reporting date, the Company’s operating cycle is considered to be 12 months.

These Restated Financial Statements are presented in Indian Rupees which is the functional currency of the Company. All amounts disclosed in the Restated Financial Statements which also include the accompanying notes have been rounded off to the nearest lakhs up to two decimal

places, as per the requirement of Schedule III to the Companies Act, 2013, other than shares and per share amounts, unless otherwise stated. Wherever an amount is represented as INR '0.00' (zero) it construes a value less than rupees five hundred.

2.3 Use of estimates

The preparation of the Restated Financial Statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the application of accounting policies, reported balances of assets and liabilities, disclosure of contingent liabilities as on the date of Restated Financial Statements and reported amounts of income and expenses during the period. Management believes that the estimates and assumptions used in the preparation of Restated Financial Statements are prudent and reasonable. Actual results could differ from those estimates. Any difference between the actual results and estimates are recognised in the period in which the results are known / materialise. Any revision to accounting estimates is recognized prospectively in the current and future periods.

2.4 Investments

Investments are classified into current and long - term investments.

Investments that are readily realizable and intended to be held for not more than a year from the date on which such investments are made are classified as current investments. All other investments are classified as non-current investments.

Current investments are carried at lower of cost and fair value determined on an individual investment basis. Non-current investments are carried at cost. However, provision for diminution in value of long-term investments is made to recognise a decline, other than temporary, on an individual investment basis.

Long term investments which are expected to be realized within twelve months from the balances sheet date are presented under 'current investments' as 'current portion of loan term investments' in accordance with the current / noncurrent classification of investments as per Schedule III of the Companies Act, 2013.

The cost of investments comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Investment transactions are accounted for on a trade date basis. In determining the holding cost of investments and the gain or loss on sale of investments, the 'weighted average cost' method is followed.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

2.5 Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Borrowing costs that are directly attributable to the acquisition, construction or development of a qualifying asset are capitalized as part of the cost of the respective asset till such time the asset is ready for its intended use or sale. A qualifying asset is an asset which necessarily takes substantial period of time to get ready for its intended use or sale. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest, exchange difference arising from foreign currency borrowings to the extent they are treated as an adjustment to the borrowing cost and other costs that an entity incurs in connection with the borrowing of funds.

2.7 Taxes on income

Tax expenses comprises of current tax, deferred tax charge or credit and adjustments of taxes for earlier years.

Provision for current tax is made as per the provisions of Income Tax Act, 1961.

Deferred tax charge or credit reflects the impact of current period timing differences between taxable income and accounting income for the period and reversal of timing differences of earlier years and are measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date.

Deferred tax assets are recognised only to the extent there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that they can be realised against future taxable profits. Deferred tax assets are reviewed for the appropriateness of their respective carrying amounts at each balance sheet date.

2.8 Cash and cash equivalents

Cash and cash equivalents include cash in hand, bank balances, deposits with bank (other than on lien) and all short term and highly liquid investments that are readily convertible into known amounts of cash and are subject to an insignificant risk of change in value.

2.9 Cash flow statement

Cash flows are reported using the indirect method, whereby net profit/loss before tax is adjusted for the effects of transactions of non-cash nature, any deferrals of accruals of past or future operating cash receipts or payments and item of income or expense associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

2.10 Inventories

Inventories are valued at lower of cost or net realisable value. Cost is determined on a First In-First Out (FIFO) basis and includes all applicable costs, including inward freight, incurred in bringing goods to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale. Provisions are made towards slow-moving and obsolete items based on historical experience of utilisation on a product category basis, which consideration of product lines and market conditions.

2.11 Foreign currency transactions

Transactions in foreign currency are recorded at exchange rates prevailing at the date of transactions. Exchange differences arising on foreign exchange transactions settled during the period/year are recognised in the statement of profit and loss of the period/year.

Monetary assets and liabilities denominated in foreign currencies which are outstanding, as at the reporting period are translated at the closing exchange rates and the resultant exchange differences are recognised in the statement of profit and loss.

Non-monetary assets and liabilities denominated in foreign currencies that are measured in terms of historical cost are translated using the exchange rate at the date of the transaction.

Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rate at the date when such value was determined.

2.12 Employee benefits

- **Short-term employee benefits**

Employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognized during the period/year.

- **Post-employment benefits**

- (a) Defined contribution plans**

Contributions to the provident fund, which is defined contribution scheme, are recognised as an employee benefit expense in the statement of profit and loss in the period in which the contribution is due. Contributions are made in accordance with the rules of the statute and are recognised as expenses when employees render service entitling them to the contributions.

- (b) Defined benefit plans**

The employees' gratuity scheme is a defined benefit plan. The present value of the obligation under such defined benefit plans is determined based on actuarial valuation using the projected unit credit method, which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plans, is based on the market yields on government securities as at the reporting date, having maturity periods approximating to the terms of related obligations.

In case of funded plans, the fair value of the planned assets is reduced from the gross obligation under the defined benefit plans, to recognise the obligation on net basis.

When the benefits of the plan are changed or when a plan is curtailed, the resulting change in benefits that relates to past service or the gain or loss on curtailment is recognised immediately in the statement of profit and loss. Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises gains/ losses on settlement of a defined plan when the settlement occurs.

2.13 Property, plant and equipment

- **Recognition and measurement**

Property, plant and equipment are stated at cost, net of accumulated depreciation (other than freehold land) and impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalisation criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Capitalisation of costs in the carrying amount of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by the Company. Any trade discounts and rebates are deducted in arriving at the purchase price.

The Company identifies and determines cost of each component/ part of the asset separately, if the component/ part has a cost which is significant to the total cost of the asset and has useful life that is materially different from that of the remaining asset. These components are depreciated separately over their useful lives; the remaining components are depreciated over the life of the principal asset.

- **Subsequent costs**

Subsequent expenditure related to an item of property, plant and equipment is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. Incomes and expenses related to the incidental operations not necessary to bring the item to the location and the condition necessary for it to be capable of operating in the manner intended by the Company are recognised in the Statement of profit and loss. All other expenses on existing property, plant and equipment, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the Statement of Profit & Loss for the period/year in which such expenses are incurred.

Capital work-in-progress comprises of property, plant and equipment that are not ready for their intended use at the end of reporting period and are carried at cost comprising direct costs, related incidental expenses, other directly attributable costs and borrowing costs.

- **Disposal**

An item of property, plant and equipment is derecognised upon disposal or when no future benefits are expected from its use or disposal. Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognised net within other income/ expenses in the statement of profit and loss.

- **Depreciation**

Depreciation on Property, plant and equipment's is provided on written down value method using the management assessed useful lives of the assets which is in line with the manner prescribed in Schedule II of the Companies Act, 2013. The useful life is as follows:

Class of asset	Useful lives as per schedule II (Years)	Useful lives considered as per management estimate (Years)
Plant and equipments	15	5
Furniture and fixtures	10	10
Office equipments	5	5
Computers	3	3
Vehicles	8 to 10	8 to 10
Electrical Installations and Equipments	5	5

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at regular intervals and adjusted prospectively, if appropriate.

Leasehold improvements are depreciated over the primary lease period.

2.14 Intangible Assets

- **Recognition and measurement**

Intangible assets are recognised when the asset is identifiable, is within the control of the Company, it is probable that the future economic benefits that are attributable to the asset will flow to the Company and cost of the asset can be reliably measured.

Intangible assets acquired separately are measured on initial recognition at cost. Intangible assets acquired by the Company that have finite useful lives are measured at cost less accumulated amortisation and any accumulated impairment losses. Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level.

Expenditure on research activities is recognised in the statement of profit and loss as incurred. Development expenditure is capitalised only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the Company intends to complete development and to use or sell the asset.

- **Subsequent measurement**

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates.

- **Amortisation**

Amortisation is calculated over the cost of the asset, or other amount substituted for cost. Amortisation is recognised in statement of profit and loss on a written down value basis over the estimated useful lives of intangible assets from the date that they are available for use.

Class of asset	Useful lives considered (In years)
Trademark	5
Computer Software	5

- **Disposal**

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

2.15 Provisions, contingent liabilities and contingent assets

A provision is recognised when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value (except dismantling / decommissioning liabilities that are recognised as cost of Property, Plant and Equipment) and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not require an outflow of resources. When there is a possible obligation or a present obligation in respect of which likelihood of outflow of resources is remote, no provision or disclosure is made.

Contingent assets are neither disclosed nor recognised.

2.16 Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss (after tax) for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events of rights issue and bonus issue.

BUSINESS OVERVIEW

We are a derma-cosmetic development company, associated with contract manufacturers, distributor and third party product development agencies, which has enabled us in developing capabilities, in manufacturing, packaging and distribution. The core focus of our Company is on development of problem solving dermatological, cosmeceutical and aesthetical products, and therefore to direct all our efforts towards product formulation and development, we have outsourced key functions such as manufacturing, prototype development and distribution to third parties, for effective management and execution. In line of the aforementioned business strategy, we have presently created a business presence in Karnataka, Andhra Pradesh and Telangana, wherein we focus on deepening our presence in the regions we operate in, before venturing into new markets, thereby enabling us to establish a customer base in such states. This enables the target customers to identify with our product portfolio and aids our understanding of the market segment and the customer demand preference. The product portfolio of our Company is divided into two categories, namely, (i) development and contract manufacturing of generic dermatological solutions; and (ii) developing and formulating solutions to specific dermatological problem. Majority of the products marketed by us, were developed by our Promoter and Managing Director, Anand Gandhi, in the capacity of a sole proprietor of M/s. Amwill Healthcare. In order to formalise the business of M/s. Amwill Healthcare and to widen the reach of its products, our Promoters formed our Company and executed a Memorandum of Understanding dated March 31, 2020 with M/s. Amwill Healthcare and our Company ("**Asset Transfer MoU**"), wherein intellectual property rights, on the products developed by our Promoters under M/s. Amwill Healthcare were transferred to our Company, for a consideration of ₹ 91.06 lakhs. Since incorporation of our Company, has developed seven new products, namely proputor tabs, XL hydra cream, ozederm cream, PD-pill 10 tablets, XL aqua moisturising lotion, ultra kromaglo effervescent tablets and depimed ultra cream. Out of these products, our Company did not receive a positive response for PD -pill 10 tablets, proputor tabs and ozederm cream and therefore has discontinued former two products. For details in respect of these products, please refer to "*Our Business – Case Studies*" on page 126.

Since inception, our focus has been on developing formulations which offer solutions to various dermatological disorders. Owing to the longstanding experience of our Promoters in the dermatological industry, our Promoters have remained in constant touch with various dermatologists and medical professionals. Due to our ongoing professional relationship with such dermatologists and medical professionals, we have been able to leverage their experience, while developing our products. Our Company during the ordinary course of business, seeks advice from various dermatologists and medical professionals, to develop solutions for various dermatological problems. The dermatologists, assist and advise our Company in identifying the gaps in skincare or cosmetic market, through their experience. Our Company based on such suggestions identifies a dermatological problem and develops a formulation of a derma-cosmetic suitable for addressing the designated problem. Our Managing Director, Anand Gandhi heads the product development initiatives and formulation development and has assisted our Company in curating an extensive product portfolio aimed at addressing various dermatological disorders, including acne, fungal infections, anti-ageing, histaminic, peri orbital hyperpigmentation, scabies, perspiration, trichology and vitiligo. We believe that our Company has by actively involving dermatologists and medical professionals, in its product development process developed a hands-on approach towards product development by identifying subsisting dermatological problems, thereby enabling us to appropriately positioning our products in the market.

We are associated with contract manufacturers for manufacturing our products, in accordance with the technical and quality specifications prescribed by our Company. Our contract manufacturers have requisite certifications to undertake manufacturing of our derma-cosmetic products, in a manner that is compliant with the regulatory guidelines and ensures that the final product meets high-quality standards. We have also executed formal arrangements with majority of the contract manufacturers, which govern various matters such as, specification of manufacturing products, quality standards to be maintained, sales estimates, packaging of products, use and protection of intellectual property, *etc.* Our association with manufacturers enable us to offer diverse solutions to our customers, including manufacturing, packaging and compliance with requisite quality standards. In addition to contract manufacturers, we also have informal arrangements with some of the contract developers, who prepare the active ingredients of our products using the technical formulations developed in consultation with our dermatologists. Third party contract developers play a major role in aiding the development and formulations for generic as well as solution oriented dermatological products.

Phased implementation of Unified Payments Interface

SEBI issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no.

SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

- c) Phase III/T+3: This phase has become applicable vide T+3 Press Release. In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Press Release as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company was required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
