We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

For further details of certain material legal proceedings involving our Company, our Promoters, our Directors, see “*Outstanding Litigations and Material Developments*” beginning on page 199 of this Prospectus.

2. In the past, we have not adhered to certain statutory time lines and have been subjected to penalty. Any such events in future may require the statutory authorities to take action against us in which event we may be drawn into litigation.

In the past we have not adhered to timelines for deposit of Professional tax and GST dues and have accordingly been subjected to interest penalties and delayed filing fees under the provisions of the relevant statute. Although we have deposited all the dues along with late fees and penalties, we are not sure if we shall be able to adhere to statutory requirements in future and not be adhered to penalties or any other statutory actions against us in which event our financials and cash flows along with our reputation with our employees shall be adversely affected. Further although the interest levied are very small in our earlier defaults, any such continued practice may subject us to regular penalties which when accumulated, may burden our cash flows and profitability.

Further we have at several instances filed our returns and other documents with the concerned Registrar of Companies beyond the statutory time lines and have accordingly been subjected to late filing fees. Although we have taken measures to curb these delays by building strict internal controls and appointing appropriate officer to take care of same, we are not sure that any such delay shall not occur in future. Although we have not been subjected to any penalty in respect of such delayed filings, except for the late filing fees, such continued practice may subject us to regular penalties which when accumulated, may burden our cash flows and profitability.

3. One of our Directors and Promoter, Jitendra Narayan Das was disqualified under section 164 of the Companies Act,

2013, in the past for being director of M/s. Reverie Technologies Pvt. Ltd., and M/s. Easedata Solutions Pvt. Ltd. which failed to file its Annual returns and Financial statements for a continuous period of 3 years.

One of our Directors Mr. Jitendra Narayan Das was disqualified under section 164 (2) of the Companies Act, 2013 during the period of January 01, 2016 till October 31, 2021, for being director of a Company's M/s. Reverie Technologies Pvt. Ltd. and M/s. Easedata Solutions Pvt. Ltd., which failed to file its Financial statements and Annual returns. The disqualification was later removed after completion of the disqualification period on October 31, 2020. Except for the disqualification his DIN, Mr. Das has not been subjected to any kind of penalty during the period of his disqualification. However, we are not sure any such action shall not be taken against us or our Director in future for any non-compliances in past. Further we are not sure that the director shall not incur any such disqualification in future and any such event in future may cause adverse effect on the day-to-day affairs of the Company, reputation and resultantly on the business of the Company and the concentration of our promoters cum Directors may shift from our Business thus adversely affecting our financial position.

4. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

(₹ in Lakhs)

Standalone Basis	Year ended March 31,		
	2024	2023	2022
Net cash generated from/ (used in) operating activities.	(1,134.02)	261.48	(14.45)
Net cash generated from/ (used in) investing activities.	10.61	(230.13)	1.90
Net cash generated from/ (used in) financing activities.	1072.95	57.10	39.88

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

For further details, see section titled “Restated Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 178 and 188 respectively of this Prospectus.

5. In the past, there have been certain discrepancies with respect to the appointment of our statutory auditors. Although we have not been issued with any statutory notice in respect of such discrepancies, by the concerned authority, we are not sure that any such action shall not be taken against us in future and in any such event we may be subjected to penalties.

We appointed CA Mukund Kumar Thakur of M/s. Goenka Mishra & Associates as the statutory auditor of the Company on September 30, 2019, for a period of 5 financial years effective from 2019-2024. However later CA Mukund Kumar Thakur reconstituted his firm as “Thakur Mukund & Associates” and his appointment was made vide resolution dated November 30, 2021 for a period of F.Y. 2021-26 without the resignation of M/s. Goenka Mishra & Associates whose term of appointment was till March 2024. Although we have not received any objection either from M/s. Goenka Mishra & Associates or from the authority, we are not sure if we shall not be issued with any notice in respect of such non-compliance from the relevant authority and in such event we may be subjected to penalty in terms of the provisions of the Companies Act, 2013 and amendments thereto. It is to be noted that M/s. Garima & Associates had resigned from their appointment, in the Annual General Meeting of the Company held on September 27, 2023, due to preoccupation in other assignments and tendered their resignation on December 01, 2023,

6. We are dependent on our ability to develop new services and products and enhance our existing services and products. If our products and services do not gain market acceptance, our operating results may be negatively affected.

Rapid technological advances, changing models and evolving standards in services like Advanced Traffic Management System, Tunnel Management System, Software development, etc. and frequent new product introductions and enhancements characterize the industry in which we operate. Digitization is driving major changes in the global business software market, with IT leaders looking to adopt new technologies and software platforms to meet business needs, including revenue growth driven through new products and services, better customer experience and delivery mechanisms, and growth in revenue and profits. Our success depends upon our ability to anticipate, design, develop, test, market, license and support new services, and enhancements of current products and services in response to evolving industry requirements. To effectively meet customer demand, it is important that we continue to enhance our products and service offerings. The markets for our offerings are rapidly evolving due to which the level of acceptance of such products and services is not certain. If the markets for our services fail to develop, develop slower than expected or experience increased competition, our business may suffer. As a result, we may be unable to successfully market our existing services and products, develop

and successfully launch new products and services and enhancements to existing products and services, complete customer implementations on a timely basis, or complete products and services currently under development. If our services are not accepted by our customers or by associated businesses in our target verticals and markets, our business, operating results and financial condition will be materially adversely affected.

7. Our business is substantially dependent on road projects in India undertaken or awarded by governmental authorities and other entities funded by the Government of India or State Governments and we derive almost all of our revenues from contracts with a limited number of government entities. Any adverse changes in the Central or State Government policies may lead to our contracts being foreclosed, terminated, restructured or renegotiated.

Our business is substantially dependent on road projects in India undertaken or awarded by governmental authorities and other entities funded by the Government of India or State Governments. We currently derive almost all of our revenues from EPC contracts entered with Companies who in turn enter into contract with a limited number of government entities. These include NHAI, MSRDC, RIDCOR, RSRDC, MJPRCL and HRBC. There can be no assurance that the Government of India or the State Governments will continue to place emphasis on the road infrastructure sector. In the event of any adverse change in budgetary allocations for infrastructure development or a downturn in available work in the road infrastructure sector or de-notification of toll collection resulting from any change in government policies or priorities, our business prospects and our financial performance, may be adversely affected.

The contracts with Government entities may be subject to extensive internal processes, policy changes, Government or external budgetary allocation and insufficiency of funds which may lead to lower number of contracts available for bidding or increase in the time gap between invitation for bids and award of the contract. So long as Government entities are responsible for awarding contracts to us and are a critical party to the development and ongoing operations of our projects, our business is directly and significantly dependent on projects awarded by them. With reference to projects where the bids of Companies have been successful, there may be delays in award of the projects and/or notification of appointed dates, which may result in us having to retain resources which remain unallocated, thereby adversely affecting our financial condition and results of operations.

Any adverse changes in the Government of India or State Government policies may lead to our contracts being foreclosed or terminated. For example, the Punjab Government recently closed down 10 toll plazas in Punjab awarded to various toll contractors. There is no assurance that the Government will not close down any more toll plazas in the future. In the event that the Central or any State Government closes down toll plazas belonging to any of our projects where we offer Operation & Maintenance Service (OMS) of Electronic Toll Collection (ETC) system, there can be no assurance that we will recover the costs incurred in undertaking the project, including payments made to the respective authority, which may lead to an adverse effect on our business, prospects, cash flows and financial condition. Adverse changes in Government policies may also lead to our contracts being restructured or renegotiated, resulting in, amongst others, change in the scope of our work under such contracts. We cannot assure you that we would be able to recover the cost associated with undertaking any such additional work which was not contemplated at the time of entering into the contracts. Further, adverse changes in the Government of India or State Government policies may also materially and adversely affect our financing, capital expenditure, revenues, development, cash flows or operations relating to our existing projects as well as our ability to participate in competitive bidding or bilateral negotiations for our future projects.

8. There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to consolidation of financial statements of our associate company. Although we have not been issued with respect to same in this regard, we are not sure that any penal action shall not be taken against us.

Our Company has invested into 50% equity of a body corporate named Trays Tunnel Solutions Private Limited which forms our associate company, and we were required to consolidate the financials of the associate Company with that of our Company in terms of Section 129 of the Companies Act, 2013. However, we have not been able to do so due to oversight and as a corrective measure, have got the consolidation done in the restated financial statements as mentioned in this Prospectus.

Although no cognizance has been taken by the authority in the above matters till date and no notice in respect of same have been served by the concerned authorities till date, we are not sure that no such notice shall be issued in future or at all and in any such event we may be subjected to a penalty. However, if any action is taken by the concerned authority in the matter and in the event of any penalty being imposed against the Company by the concerned authority, the financials of the company shall be adversely affected.

9. Our failure to perform in accordance with the standards prescribed in work order of our client could result in loss of business or compensation payment.

We received work orders from our clients. The majority of these work orders may require us to comply with the code of conduct and rules and regulations prescribed by our clients, which may increase our compliance costs. We may be unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls. Further any disruptions to our businesses as a result of actions outside of our control, could significantly impact the continued performance of our obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In the event that we are unable to meet the prescribed obligations, we may also be required to pay compensation to our clients on the terms set out in our contracts. In certain instances, we may also be required to bear consequential liability. Certain work order may also require us to provide indemnities to our clients with respect of any negligent act or omission by or misconduct of our employees. In the event there is an increase in claims against us for which we are not insured, our business, financial condition and results of operations may be affected.

10. Our work premises from where we operate is not owned by us.

Following are the details of our offices which are not owned by our company:

Sr. No.	Details of Property	Licensor/Lessor Vendor	Owned/Lease d/ License	Consideration/ Lease Rental/ License Fees (in ₹)	Usage

5.	Office No.- BF-01 (Basement Area), Sector-63, Noida- 201 301, Uttar Pradesh, India	M/s Europa Industries Private Limited	Rented	₹25,000/-	Godown

We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favorable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favorable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

11. Interruptions or performance problems associated with our technology and infrastructure may harm our business and results of operations.

Our continued growth depends in part on the ability of our existing and potential customers to access our solutions at any time. Although there have not been instances in the past where interruptions or problems with our technology and infrastructure have caused performance issues, we may in future experience disruptions, data loss, outages and other performance problems with our technology infrastructure due to a variety of factors, including infrastructure changes, introductions of new functionality, human or software errors, capacity constraints, denial of service attacks or other security-related incidents. In some instances, malfunctions or failures in hardware and software components can disrupt traffic management operations, leading to increased congestion and potential accidents. Similarly, Technical malfunctions in toll collection equipment, software, or communication networks can disrupt toll operations, leading to revenue loss and traffic congestion and malfunctions in tunnel monitoring, ventilation, lighting, and emergency systems can pose significant safety

risks. We may not be able to identify the cause or causes of these performance problems within an acceptable period of time. Any disruptions in these services, including as a result of actions outside of our control, would significantly impact the continued performance of our products. To the extent that we do not effectively address capacity constraints, upgrade our systems as needed, and continually develop our technology and network architecture to accommodate actual and anticipated changes in technology, our business, results of operations and financial condition could be harmed.

12. Our systems are vulnerable to attacks, unauthorised access and disruptions. Losses or liabilities that are incurred as a result of any of the foregoing could materially adversely affect our business, financial condition and results of operations.

EPC (Engineering, Procurement, and Construction) contracts in traffic management, toll management, and tunnel management involve the design, implementation, and construction of infrastructure projects aimed at improving transportation efficiency, safety, and revenue collection. These projects involve design, installation, and integration of Intelligent Transportation Systems (ITS), toll collection facilities, designing and implementation of various systems to aid in tunnel ventilation systems, fire detection and suppression systems, lighting systems, traffic monitoring and surveillance systems, and emergency response systems. These systems are subject to cybersecurity threats which could compromise data integrity, system functionality, financial transactions, user privacy and compromise safety.

Our systems may be vulnerable to unauthorised access, computer hackers, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of, systems by third parties or employees. Although we have not experienced such attacks in the past other than instances of phishing, malware and virus attacks, we cannot assure you that our security systems in place can prevent any such attacks in the future or that we will be able to handle such attacks effectively. A hacker who circumvents security measures could misappropriate proprietary information, including personally identifiable information, or cause interruptions or malfunctions in our operations. Further, computer attacks or disruptions may jeopardise the security of information stored in and transmitted through our computer systems. Actual or perceived concerns that our systems may be vulnerable to such attacks or disruptions may deter our customers from using our solutions or services. As a result, we may be required to expend significant resources to protect against the threat of these security breaches or to alleviate problems caused by these breaches.

13. Interruptions or performance problems associated with our technology and infrastructure may harm our business and results of operations.

Our continued growth depends in part on the ability of our existing and potential customers to access our solutions at any time. Although there have not been instances in the past where interruptions or problems with our technology and infrastructure have caused performance issues, we may in future experience disruptions, data loss, outages and other performance problems with our technology infrastructure due to a variety of factors, including infrastructure changes, introductions of new functionality, human or software errors, capacity constraints, denial of service attacks or other security related incidents. In some instances, we may face challenges integrating the toll management system with other transportation and payment systems can result in inefficiencies and user dissatisfaction. We can face similar interoperability and integration issues in integrating various tunnel management technologies (e.g., ventilation, lighting, surveillance) as they can be complex and prone to compatibility issues.

Inability to identify the cause or causes of these performance problems within an acceptable period of time may cause harm to our business. Any disruptions in these services, including as a result of actions outside of our control, would significantly impact the continued performance of our products. Any loss of the right to use any of these services could result in decreased functionality of our products until equivalent technology is either developed by us or, if available from another provider, is identified, obtained and integrated into our infrastructure. To the extent that we do not effectively address capacity constraints, upgrade our systems as needed, and continually develop our technology and network architecture to accommodate actual and anticipated changes in technology, our business, results of operations and financial condition could be harmed.

14. Significant disruptions in our information technology systems or breaches of data security could adversely affect our business and reputation.

In today's digital landscape, effective data management is crucial for the successful operation and integrity of traffic management, toll management, and tunnel management systems. However, the increasing reliance on sophisticated data systems introduces significant risks that need to be meticulously managed. Data management risks encompass a range of challenges, including ensuring data accuracy, maintaining data privacy and security, and safeguarding against data breaches and cyber threats. These risks, if not properly addressed, can compromise system performance, lead to financial losses, and erode public trust. Our Company has not face any such breach in our data management, however, inability to do so in the future may lead to significant financial losses as well as cause harm to the goodwill of the Company.

Our systems are potentially vulnerable to data security breaches, whether by our employees, or our service providers or others that may expose sensitive data to unauthorized persons. Although we maintain systems and procedures to prevent unauthorized access and other security breaches, it is possible that unauthorized individuals could improperly access our systems, or improperly obtain or disclose sensitive data that we process or handle. Data security breaches could lead to the loss of intellectual property or could lead to the public exposure of personal information. Any such security breaches or compromises of technology systems could result in institution of legal proceedings and penalties, which may have an adverse effect on our business and reputation. We would like to state that no instances of data breach or security breach has occurred within our Company till date.

15. Delays in project timelines due to unforeseen challenges, such as site conditions, procurement issues, or labor shortages, can increase costs and affect project viability.

Delays in project timelines due to unforeseen challenges, such as adverse site conditions, procurement issues, or labor shortages, can significantly impact the successful completion of our projects. These delays not only increase overall project costs but also jeopardize the project's viability by pushing back critical deadlines and reducing operational efficiency. Furthermore, such setbacks can lead to contractual penalties, strained client relationships, and reputational damage. The cumulative effect of these delays can result in substantial financial losses for the company, undermining our ability to compete effectively and threatening our long-term sustainability and market position.

16. Increased governmental regulations may place additional burdens on our business and growth.

Changes in government strategies and policies can significantly impact the EPC (Engineering, Procurement, and Construction) business, particularly in the areas of Advanced Traffic Management Systems (ATMS), Toll Management Systems, and Tunnel Management Systems. In India, while the Government of India has liberalised many aspects of our business, we cannot assure you that in the future, government may not impose additional regulations that will impact our business activities. Further, Introduction of new regulations or changes in existing standards can necessitate redesigns, retrofits, or additional compliance measures, leading to increased costs and project delays. Stricter environmental and safety regulations may require additional investments in technology and infrastructure to meet compliance, impacting project budgets and timelines.

Changes in government priorities could result in reduced funding or budget cuts for transportation infrastructure projects, leading to project cancellations, scale-backs, or delays. Further, any shifts in government policies regarding Public-Private Partnership (PPP) models can affect the viability and attractiveness of EPC projects, influencing investment decisions and risk-sharing arrangements. Modifications to tax policies, such as changes in corporate tax rates or incentives for infrastructure investments, can affect the financial feasibility of EPC projects. Any new changes in tariffs and trade policies can impact the cost of imported materials and equipment, affecting project budgets and procurement strategies. Any of these occurrences could adversely affect our ability to operate in certain markets, which could result in a competitive disadvantage for us and the possible loss of customers and revenue.

17. We source a large part of our new orders from our relationships with corporates and other customers, both present and past. Any failure to maintain our long-standing relationships with our existing customers or forge similar relationships with new ones would have a material adverse effect on our business operations and profitability.

We believe that our focus on completing projects in a timely manner and on quality has helped us build strong relationships with our customers and bolster our reputation in the industry in which we operate. In fact, all of the projects that we execute for private sector clients are sourced through nomination i.e. where customers with whom we have an existing relationship or new customers approach us directly for their proposed projects. Further, we have received additional projects from several of our existing customers despite increased competition in the region within which we operate. If any of our relationships with our existing customers were to be altered or terminated and we are unable to forge similar relationships with new customers in the future, our business, financial condition, results of operations, cash flows and business prospects could be materially and adversely affected.

18. We may become liable to our customers and lose customers if we have defects or disruptions in our service or if we provide poor service. We may also be liable in the event of misuse of our services or platforms.

We deliver a service, and errors or defects in our services underlying our services, or a failure of our hosting infrastructure, may make our services unavailable to our customers. Majority of our contracts involve projects that are critical to the operations of our clients' businesses. Any failure in a client's system and any direct damages, expenses, costs, obligations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Any errors, defects, disruptions in service or other performance problems with our services, whether in connection with the day-to-day

operation of our services, upgrades or otherwise, could damage our customers' businesses.

19. We have not entered into any long-term contracts with any of our customers and typically operate on the basis of work orders, which could adversely impact our revenue and profitability.

We do not have any long-term contracts with our customers and we provide services on basis of regular work order with our customers which could adversely affect the business of our company. We cater our services on an order to order basis. Our customers can terminate their relationship with us by giving notice and as such terms and conditions as mutually agreed upon, which could materially and adversely impact our business. Although we believe that we have satisfactory business relation with our customers and have received business from them in the past and will regularly receive the business in future also but there is no certainty that we will receive business in future from them and may affect our profitability.

20. Our business segment may be prone to safety risks, which could impact the well-being of users and operational integrity.

Fires within tunnels pose significant risks due to the confined spaces, making effective fire detection, suppression, and ventilation systems critical for ensuring safety. Additionally, ensuring the long-term structural integrity of tunnels is essential to prevent collapses and other safety hazards. Proper maintenance and regular inspections are vital to address these safety concerns and safeguard the well-being of users and the operational reliability of the tunnel infrastructure. Failure to implement and maintain these safety measures on our part may not only endanger lives but also lead to significant business losses due to potential legal liabilities, increased insurance premiums, repair costs, and reputational damage. Ensuring robust safety protocols is thus paramount to sustaining both operational excellence and financial stability.

24. We have been recently converted into public limited company and any non-compliance with the provisions of Companies Act, 2013 may attract penalties against our Company which could impact our financial and operational performance and reputation.

The Company was converted into Limited Company pursuant to a special resolution passed by our shareholders at the Extra-Ordinary General Meeting held on February 03, 2024 and consequently the name of our Company was changed to "Trafiksol ITS Technologies Limited" and a fresh certificate of incorporation was issued by the Registrar of Companies, Central Processing Centre dated May 18, 2024. However, consequent to the aforesaid conversion, our Company is required to observe compliance with various provisions pertaining to public limited companies of the Companies Act. Further, our Company is going to the public for further requirement of funds and needs to comply with provisions of SEBI ICDR Regulations and SEBI (LODR) Regulations. Though our Company will take due care to comply with the provisions of the Companies Act and other applicable laws and regulations. In case of our inability to timely comply with the requirements or in case of any delay, we may be subject to penal action from the concerned authorities which may have an adverse effect

on our financial and operational performance and reputation.

25. Our success largely depends upon the knowledge and experience of our Promoters, Directors, our Key Managerial Personnel and Senior Management as well as our ability to attract and retain personnel with technical expertise. Any loss of our Promoter, Directors, Key Managerial Personnel, Senior Management or our ability to attract and retain them and other personnel with technical expertise could adversely affect our business, financial condition and results of operations.

Our success largely depends upon the knowledge and experience of our Promoters, Directors, Key Managerial Personnel and Senior Management as well as our ability to attract and retain skilled personnel. Any loss of our Promoters, Directors, Key Managerial Personnel and Senior Management or our ability to attract and retain them and other skilled personnel could adversely affect our business, financial condition and results of operations. We depend on the management skills and guidance of our Promoter for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel and Senior Management. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Managerial Personnel or Senior Management are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business, financial condition and results of operations could be adversely affected.

In addition, we may require a long period of time to hire and train replacement personnel when personnel with technical expertise terminate their employment with us. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining personnel with technical expertise that our business requires. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

There is significant competition for management and other skilled personnel in our industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. If we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further information, see “Our Management” on page 154 of this Prospectus.

26. Our ability to maintain our competitive position and to implement our business strategy is dependent to a significant extent on our senior management team and other key personnel, in particular, our Promoters.

We depend on our current senior management for the implementation of our strategy and the operation of our day-to-day activities. Furthermore, relationships of members of senior management are important to the conduct of our business. Competition for experienced management personnel in the business sectors we operate in is intense, the pool of qualified candidates is limited, and we may not be able to retain our senior executives or key personnel or attract and retain skilled senior executives or key personnel in the future. Consequently, there can be no assurance that these individuals will continue to make their services available to us in the future. Any significant loss of senior management or key personnel could materially and adversely affect our business, financial condition, results of operations and prospects. In addition, if any member of our senior management team or any of our other key personnel joins a competitor or forms a competing business unit, we may consequently lose our proprietary know-how for the benefit of our competitors. Our success depends heavily upon the continuing services of our Promoter who has been the leader since our inception. Our Promoter currently serves as our Managing Director and his experience and vision have played a key role in obtaining our current market position. If our Promoter is unable or unwilling to continue to serve in his present position, we may not be able to replace him with an executive of similar capacity or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

28. We face competition from larger multinational corporations and our inability to compete effectively may have a material adverse impact on our business, financial condition and results of operations.

We face significant competition from larger multinational corporations (MNCs) that have the financial strength to secure contracts by offering prices that would be unsustainable for smaller firms like ours. These MNCs can afford to take on projects at lower margins or even at a loss, leveraging their extensive resources and diversified revenue streams to absorb the financial hit. In contrast, our inability to compete with such aggressive pricing strategies can have a material adverse impact on our business. This competitive disadvantage may lead to a loss of potential contracts, negatively affecting our financial condition and overall results of operations. Without the same capacity to endure sustained financial losses, our company's growth and market position are at risk.

29. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew certain approvals, licenses, registration and permits from time to time from the different authorities, some of which may expire and for which we may have to make an application for obtaining the approval or its renewal. If we fail to maintain such registrations and licenses or comply with applicable conditions, then such respective regulatory can impose fine on our company or suspend and/or cancel the approval/licenses which may affect our business adversely.

Our Promoters and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and Our Group Company / Entity which may be or may not be at Arms’ Length Price and in Ordinary Course of Business. If the transactions are executed not on Arms’ Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. - Sustainability and Renewable Energy Integration;
- Comprehensive Defense Solutions;
- Integrated Command and Control Centers (ICCC);
- Risk Management and Mitigation; and
- Competitive Positioning.

For further information, see “Business Overview- Our Strategies” beginning on page 120 of this Prospectus.

Our strategy may not succeed due to various factors, including our inability to reduce our debt and our operating costs, our failure to develop new products and services with sufficient growth potential as per the changing market preferences and trends, our failure to execute agreements with our technology partners, our failure to effectively market these new products and services or foresee challenges with respect to our business initiatives, our failure to sufficiently upgrade our

infrastructure, machines, automation, equipment and technology as required to cater to the requirement of changing demand and market preferences, our failure to maintain highest quality and consistency in our operations or to ensure scaling of our operations to correspond with our strategy and customer demand, changes in GoI policy or regulation, our inability to respond to regular competition, and other operational and management difficulties. For further details of our strategies, see “*Business Overview*” beginning on page 120 of this Prospectus.

Further, our ability to sustain growth depends primarily upon our ability to manage key issues such as our ability to sustain existing relationships with our clients, ability to obtain raw materials at better prices, ability to compete effectively, ability to scaling up our operations, adhering to high quality and execution standards, our ability to expand our manufacturing capabilities and our presence in India as well as globally, the effectiveness of our marketing initiatives, selecting and retaining skilled personnel. Sustained growth also puts pressure on our ability to effectively manage and control historical and emerging risks. Our inability to effectively manage any of these issues and implement our business strategies may adversely affect our business growth and, as a result, impact our businesses, financial condition and results of operations.

32. If we are unable to manage our growth effectively and further expand into new markets our business, future financial performance and results of operations could be materially and adversely affected.

The success of our business will depend on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist including by Continuing to strengthen our existing product portfolio with attractive growth and profitability prospects, to strive for cost efficiency, attracting and retaining talented employees and focusing on consistently meeting quality standards.

- Project Delays and Cost Overruns;
- High Initial Capital Investment;
- Cybersecurity Threats;
- Market Competition;
- Human Resources and Expertise Shortage;
- Data Management and Privacy Issues;
- Funding and Financial Risks; and
- Environmental and Sustainability Concerns.

In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations.

Our operating expenses and capital requirements may increase significantly pursuant to our expansion plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively, further expand into new markets or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

We maintain insurance coverage which is typical in our industry which we believe to be commercially appropriate for risks. However, such insurance may not be adequate to cover all our losses or liabilities that may arise from our operations. Our insurance policies contain exclusions and or all limitations on coverage, as a result of which, we may not be able to successfully assert our claims for any liability or loss under the said insurance policies.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

49. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager have appointed S S Securities Limited as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

50. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include income tax and GST and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

51. If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our clients thereby reducing our margins.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

52. Significant differences exist between Indian GAAP and Ind-AS, on one hand, and other accounting principles, such as U.S. GAAP, IFRS and IndAS, on the other hand, which may be material to investors’ assessments of our financial condition.

Our restated financial statements for the period between April 1, 2023 to March, 2024 as well as for the years ended Financial Years 2023, 2022 have been prepared in accordance with the AS, read with the Companies (Accounting Standards) Rules, 2015. We have not attempted to quantify the impact of US GAAP or IFRS or IndAS on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP or IFRS. IndAS, US GAAP and IFRS differ in significant respects from AS. Accordingly, the degree to which the Restated Financial Statements included in this Prospectus will provide meaningful information is entirely dependent on the reader’s level of

familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

53. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index - based market - wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

54. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares is ₹70. This price is being based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page 99 of this Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following:

- a) Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- b) Changes in revenue or earnings estimates or publication of research reports by analysts;
- c) Speculation in the press or investment community;
- d) General market conditions; and
- e) Domestic and international economic, legal and regulatory factors unrelated to our performance.

55. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on BSE SME Platform in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE SME Platform. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

56. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

57. An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our operations.

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus and its variants, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition.

58. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required.

Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

59. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

60. Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

61. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Prospectus.

While facts and other statistics in this Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "Industry Overview" beginning on page 111 of this Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

62. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt

levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

63. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

64. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

65. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

66. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

2,000	21	5,000	166.67%

Assumptions for working capital projections made by our Company:

Particulars	Details
Trade Receivable	Trade receivables are the amount owed to the Company by customers following sale of services on credit. Trade receivable days are computed as a function of revenue from operations.
	Our company has estimated the holding level for Trade Receivables days as ranging from 175 days considering the normal credit period in the ITS business. Estimated Trade receivable cycle will be approximately 110 days for FY 2024- 25 & FY 2025-26 respectively. Typically, the trade receivables cycle is approximately 5 months to 6 months however, due to the year-end, some debtors are not making promptly payments as on March-2024 resulting in a higher receivables period as of year-end.
	We are expecting this to decrease marginally to 110 days in FY 2024 from FY 2023 period and to remain stable in Fiscal 2025 and 2026, More credit period is offered to customers because to penetrate new customers and attract more orders, Company will be required to offer enhanced credit period so that it will encourage new customers to have a long-term business relation with us and also has a competitive edge.
Other current assets	Other current assets relate to Advances to Suppliers for the Raw Material requirement to fulfil the Sales demand which is in line with the increase in business operations, there will be need to purchase materials and by making advance payments to enhance cost efficiency of products. In order to meet the demand of the new sales orders this amount will increase substantially as compared to Fiscal 2023. To maintain the timely availability of material for the projects in this business, suppliers will have to be paid in advance.

SECTION VI- ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and industry sources. Neither we nor any other person connected with the Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. OVERVIEW OF INDIAN ECONOMY

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government’s continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India’s exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to

grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- As of April 12, 2024, India's foreign exchange reserves stood at US\$ 643.162 billion.
- In 2023, India saw a total of US\$ 49.8 billion in PE-VC investments.
- Merchandise exports in March 2024 stood at US\$ 41.68 billion, with total merchandise exports of US\$ 437.06 billion during the period of April 2023 to March 2024.
- India was also named as the 48th most innovative country among the top 50 countries, securing 40th position out of 132 economies in the Global Innovation Index 2023. India rose from 81st position in 2015 to 40th position in 2023. India ranks 3rd position in the global number of scientific publications.
- In March 2024, the gross Goods and Services Tax (GST) stood at second highest monthly revenue collection at Rs.1.78 lakh crore (US\$ 21.35 billion), of which CGST is Rs. 34,532 crore (US\$ 4.14 billion), SGST is Rs. 43,746 crore (US\$ 5.25 billion).
- Between April 2000–December 2023, cumulative FDI equity inflows to India stood at US\$ 971.52 billion.
- In February 2024, the overall IIP (Index of Industrial Production) stood at 147.2. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 139.6, 144.5 and 187.1, respectively, in February 2024.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 5.69% in December 2023.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 8.06 billion) in India during January-April 2024.
- The wheat procurement during RMS 2023-24 (till May) was estimated to be 262 lakh metric tonnes (LMT) and the rice procured in KMS 2023-24 was 385 LMT. The combined stock position of wheat and rice in the Central Pool is over 579 LMT (Wheat 312 LMT and Rice 267 LMT).

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to

Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Note: Conversion rate used for January 2024 is Rs.1 = US\$ 0.012

OVERVIEW OF THE ROAD INDUSTRY IN INDIA

India has the second-largest road network in the world, spanning a total of ~6.7 million kilometres (kms). This road network transports 64.5% of all goods in the country and 90% of India's total passenger traffic uses road network to commute. Road transportation has gradually increased over the years with improvement in connectivity between cities, towns and villages in the country.

National Highways (NH) play a very important role in the economic and social development of the country by enabling efficient movement of freight and passengers and improving access to market. They account for 2% of the total road network and carry over 40% of total traffic. The pace of NH construction has increased consistently due to the systematic push through corridor-based National Highway development approach, from about 12 km/ day in 2014-15 to about 28.3 km/ day in 2022-23.

The Indian Government has been actively investing in the development of road infrastructure. Major initiatives like the Bharatmala Pariyojana aim to upgrade and expand the road network, including the construction of expressways, economic corridors, and feeder routes. The first phase of the programme will develop 34,800 km of highways, including 27 Greenfield corridors and India's largest expressway (a 1,386 km long Delhi-Mumbai Expressway). Under the Pariyojana, 60% projects have been envisaged on Hybrid Annuity Mode (HAM), 10% projects on BOT (Toll) Mode, and 30% projects on EPC mode.

The roads and highways sector has pioneered several innovative public-private partnership (PPP) models besides having a strong contractual framework compared with other sectors. These factors have led to significant investments from private players in the sector. Several incentives have also been announced by the Government to attract private sector participation and foreign direct investment, which include Government bearing the cost of project feasibility study, land for the right of way and way side amenities, shifting of utilities, environment clearances, etc.

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress.

Infrastructure is a key enabler in helping India become a US \$26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Mr. Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors.

The government's focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway. Infrastructure support to the nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

The "Smart Cities Mission" and "Housing for All" programmes have benefited from these initiatives. Saudi Arabia seeks to spend up to US\$ 100 billion in India in energy, petrochemicals, refinery, infrastructure, agriculture, minerals, and mining. The infrastructure sector is a key driver of the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from the Government for initiating policies that would ensure the time-bound creation of world-class infrastructure in the country. The infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India's economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure, and construction development projects.

To meet India's aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as 'Make in India' and the production-linked incentives (PLI) scheme to augment the growth of the infrastructure sector. Historically, more than 80% of the country's infrastructure spending has gone toward funding for transportation, electricity, and water, and irrigation.

While these sectors still remain the key focus, the government has also started to focus on other sectors as India's environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

Market Size

In Interim Budget 2024-25, capital investment outlay for infrastructure has been increased by 11.1% to Rs. 11.11 lakh crore (US\$ 133.86 billion), which would be 3.4 % of GDP. As per the Interim Budget 2023-24, a capital outlay of Rs. 2.55 lakh crore (US\$ 30.72 billion) has been made for the Railways, an increase of 5.8% over the previous year. Starting with 6,835 projects, the NIP project count now stands at 9,142 covering 34 sub-sectors, as per news reports. Under the initiative, 2476 projects are under the development phase with an estimated investment of US\$ 1.9 trillion. Nearly half of the under-development projects are in the transportation sector, and 3,906 are in the roads and bridges sub-sector.

In December 2022, AAI and other Airport Developers have targeted capital outlay of approximately Rs. 98,000 crore (US\$ 11.8 billion) in airport sector in the next five years for expansion and modification of existing terminals, new terminals and strengthening of runways, among other activities. India currently has the fifth-largest metro network in the world and will soon overtake advanced economies such as Japan and South Korea to become the third-largest network. Metro rail network reached 810 kms and is operational in 20 cities.

Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over 2021-26 driven by spending on water supply, transport, and urban infrastructure. Investment in infrastructure contributed around 5% of the GDP in the tenth five-year plan as against 9% in the eleventh five-year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India's planning commission during the 12th five-year plan, with 40% of the funds coming from the private sector.

OUR SERVICES AND SOLUTIONS

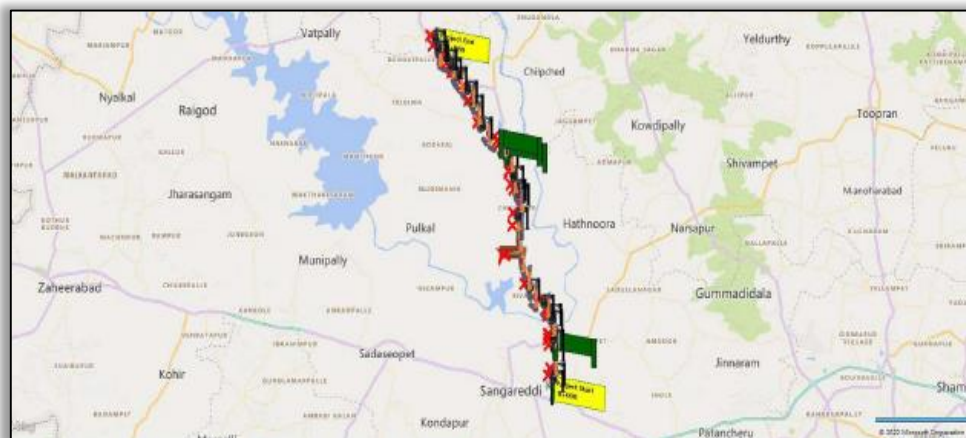

ADVANCED TRAFFIC MANAGEMENT SYSTEM (ATMS)

An Advanced Traffic Management System (ATMS) is a sophisticated technological solution designed to enhance the efficiency, safety, and overall performance of traffic networks. Our Company has successfully implemented its Advanced Traffic Management System (ATMS) in a project aimed at optimizing traffic management in a bustling urban center. In this project, TrafikSol integrated real-time traffic monitoring, traffic signal control, incident management, and data analytics to effectively reduce traffic congestion, enhance the flow of vehicles, and improve overall safety on the city's roadways. This noteworthy project exemplifies our Company's commitment to creating smart traffic solutions that benefit cities and regions by easing traffic related challenges. The company has ongoing ATMS projects like development of Six Lane Badakumari-Karki Section of NH-120-CD Road under Raipur-Visakhapatnam Economics Corridor, Four Lanning of Ahmednagar-Mirajgain-Karmala-Tembhurni section of NH-561 A under Bharatmala Pariyojana and Construction of 6-Lane access-controlled Greenfield highway as a part of Amritsar- Jamnagar Economic Corridor in the State of Rajasthan on EPC mode under Bharatmala Pariyojana (Phase-I). Here are some key details about ATMS:

- 1. Traffic Monitoring and Surveillance:** ATMS typically integrates various sensors, cameras, and other monitoring devices placed strategically across roadways to gather real-time data on traffic conditions, including vehicle flow, speeds, congestion levels, and incidents.
- 2. Data Processing and Analysis:** The collected data is processed and analyzed using advanced algorithms and software tools. This analysis provides insights into traffic patterns, trends, and potential bottlenecks, enabling traffic managers to make informed decisions in real-time.
- 3. Traffic Control and Optimization:** ATMS enables traffic managers to remotely control and optimize traffic flow through the implementation of dynamic traffic signal control, variable message signs, ramp metering, and lane control strategies. These measures help alleviate congestion, improve traffic flow, and reduce travel times for commuters.
- 4. Incident Management:** ATMS provides tools for detecting and managing traffic incidents such as accidents, road hazards, and breakdowns. Automated incident detection systems can promptly identify incidents and alert traffic management personnel, allowing for quick response and mitigation to minimize disruptions.
- 5. Integrated Communication and Coordination:** ATMS often includes communication systems that facilitate coordination among various stakeholders involved in managing the transportation network, including transportation agencies, emergency services, and maintenance crews. This ensures a coordinated response to incidents and events affecting traffic flow.
- 6. Traveler Information Services:** ATMS disseminates real-time traffic information to commuters through various channels such as dynamic message signs, smartphone apps, and websites. This information helps travelers make informed decisions about route selection, mode of transportation, and departure times, thereby reducing travel delays and improving overall satisfaction.
- 7. Adaptive and Predictive Capabilities:** Advanced ATMS solutions may incorporate adaptive control algorithms and predictive analytics to anticipate future traffic conditions based on historical data, weather forecasts, and special events. By proactively adjusting traffic management strategies, ATMS can mitigate potential congestion and improve overall network performance.
- 8. Scalability and Flexibility:** ATMS solutions are designed to be scalable and adaptable to accommodate evolving transportation needs and technological advancements. They can be tailored to suit the specific requirements of different regions, urban areas, and transportation networks.

Overall, an Advanced Traffic Management System represents a comprehensive approach to optimizing traffic operations, improving safety, and enhancing the overall efficiency of transportation networks in urban and metropolitan areas.

TOLL MANAGEMENT SYSTEM

Our Company implemented a Toll Management System (TMS) that drastically reduced congestion at the toll booths, improved the efficiency of toll collection, and enhanced the overall experience for commuters. This project serves as a testament to our Company's dedication to facilitating smooth revenue collection and supporting the growth of vital infrastructure within the region. Toll Management System (TMS) is a comprehensive set of technologies and processes designed to facilitate the efficient collection of tolls on highways, bridges, tunnels, and other tolled roadways. A few of the Toll Management Systems currently underway by our company are Rehabilitation and Up-gradation of Malkapur-Buldhana-Chikhli-Deulgaonraja-Jalna (Aurangabad) NH- 753-A Road [Section-II : At Takarkhed Bhagile to Jalna From Design Chainage for Design, Supply, Installation, Testing Commissioning and Maintenance of Toll Management System (TMS) and Rajasthan/ Gujarat Border section of NH-754K as a part of Amritsar-Jamnagar Economic Corridor in the State of Rajasthan for Design, Procurement, Installation, Commissioning and Operation & maintenance of Toll Management System and so on.

Here are the key components and functions of a typical Toll Management System:

1. **Toll Collection Devices:** TMS incorporates various toll collection devices such as toll booths, electronic toll collection (ETC) gantries, and automatic vehicle identification (AVI) systems. These devices are strategically placed along the roadway to capture toll payments from vehicles passing through designated tolling points.
2. **Electronic Toll Collection (ETC):** ETC systems enable vehicles equipped with electronic toll tags or transponders to pay tolls electronically without the need to stop at toll booths. As vehicles pass through ETC lanes or gantries, the toll amount is automatically deducted from the driver's prepaid toll account, facilitating seamless and efficient toll payment processing.

3. **Manual Toll Collection:** In addition to electronic toll collection, TMS often includes manual toll collection lanes staffed by toll attendants who collect toll payments from vehicles in cash or via electronic payment methods such as credit/debit cards.
4. **Toll Plaza Operations:** TMS manages the operations of toll plazas, including lane management, traffic flow optimization, and toll booth staffing. Advanced TMS solutions may employ dynamic lane assignment algorithms to adjust lane configurations based on traffic volumes and demand patterns, minimizing congestion and wait times.
5. **Violation Enforcement:** TMS incorporates enforcement mechanisms to address toll evasion and enforce compliance with toll payment regulations. This may involve the use of automated license plate recognition (ALPR) systems to identify vehicles with unpaid tolls or violations, leading to the issuance of fines or penalties.
6. **Transaction Processing and Settlement:** TMS processes toll transactions in real-time, recording toll payments and generating transaction records for reconciliation and settlement purposes. This includes the aggregation of toll revenues, reconciliation with toll operators, and distribution of revenues to relevant stakeholders.
7. **Customer Service and Account Management:** TMS includes customer service functionalities to support toll account management, account inquiries, and dispute resolution. Toll customers can access online portals or customer service centers to manage their toll accounts, view transaction history, and update account information.
8. **Data Analytics and Reporting:** TMS generates comprehensive data analytics and reporting tools to monitor tolling operations, analyze traffic patterns, and assess revenue performance. These insights enable toll authorities to optimize tolling strategies, improve operational efficiency, and make data-driven decisions.

Overall, a Toll Management System plays a crucial role in facilitating efficient toll collection, ensuring compliance with tolling regulations, and enhancing the overall effectiveness of transportation infrastructure financing and management.

Integrated structure with in-house capabilities to undertake most of the activities related to our projects including traffic study expertise and revenue forecasting capabilities

We undertake most of the activities related to our toll collection as well as OMT projects in-house, including tendering for the project, conducting traffic survey, forecasting revenue, achieving financial closure and collection of toll. This helps us in reducing our reliance on sub-contractors and third parties and decreases our costs. We, however, use sub-contractors from time to time for the maintenance activities part of our OMT projects.

Our in-house business development team prepares tendering documents for all our bids. Our ability to tender appropriately for our projects depends significantly on the assessment of the future traffic patterns and the amount of toll to be collected. We have developed an in-house traffic survey team, which has dual responsibility of conducting pre-bidding traffic surveys as well as monitoring loss in revenue on account of non-paying vehicles for ongoing projects. Further, for our OMT projects, we undertake engineering study which includes carrying out road condition and inventory survey of the project roads, identifying portions subject to frequent damage, inspection of major and minor structures on the project roads which involve maintenance requirements and preparation of maintenance expenditure. The engineering study is undertaken by our in-house experts with the help of third party engineering consultancy service providers who are engaged primarily for the purpose of undertaking studies regarding road condition, inspection of structures and preparing maintenance expenditure.

Ability to achieve financial closure for projects

Commercial operation of a project is typically commenced only upon achieving financial closure and our ability to achieve financial closure for our projects is demonstrated by the number of projects completed by us over the past years. We finance the payments to be made to the authorities for our projects by way of fund based as well as non-fund based loan facilities from banks/financial institutions. Our ability to obtain adequate financing for our projects provides us with increased availability of funds for our business development and other expansion activities.

The Consolidated restated financial statements (CFS) relate to Trafiksol ITS Technologies Pvt Ltd (Investor Company) and Trays Tunnel Solutions Private Limited (Associate Company).

The CFS has been prepared on following basis:-

(i) The Restated Financial Statement of Holding Company and Associate Company has been consolidated using equity method as per AS 23.

(ii) There is no change in accounting policies by Investor or Associate Company.

(iii) Goodwill / Capital reserve emerges as the investor company has equitable proportion of shareholding in associate company.

(iv) Inter group balances are not recognised as no line by line consolidation has been carried out.

The Financial Statements have been prepared in accordance with applicable accounting standards notified under Section 133 of the Companies Act, 2013 read with Rule 7 of Companies (Accounts Rules), 2014 under historical cost convention on accrual basis.

All the assets and liabilities have been classified as current or non-current as per Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of activities, the Company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

b. Use of Equipment:

The preparation of the financial statements is in conformity with Indian GAAP (Generally Accepted Accounting Principles) which requires the management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent liabilities as on the date of the financial statements. The estimates and assumptions made and applied in preparing the financial statements are based upon management's best knowledge of current events and actions as on the date of financial statements. However, due to uncertainties attached to the assumptions and estimates made actual results could differ from those estimates. Any revision to accounting estimates is recognised prospectively in current and future periods.

c. Revenue Recognition

(i) Revenue from sale of goods is recognised when significant risk and rewards of ownership of the goods have been passed to the buyer and it is reasonable to expect ultimate collection. Sale of goods is recognised net of GST and other taxes as the same is recovered from customers and passed on to the government.

(ii) Revenue from providing services is recognised in the accounting period in which the services are rendered. Invoices are issued according to contractual terms and are usually payable as per the credit period agreed with the customer.

(ii) Interest is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

(iii) Other items of income and expenses are recognised on accrual basis.

(iv) Income from export entitlement is recognised as on accrual basis.

d. Investments:

Non-Current/ Long-term Investments are stated at cost. Provision is made for diminution in the value of the investments, if, in the opinion of the management, the same is considered to be other than temporary in nature. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

Current investments are carried at lower of cost and fair value determined on an individual basis. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

f. Property, Plant and Equipment:

(i) Tangible Assets

Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

g. Depreciation & Amortization:

Depreciation is calculated using the Straight Line method over their estimated useful lives. The estimates of useful lives of tangible assets are as follows:

Class of Assets	Useful life as per schedule II	Useful Life as per Company
Office equipment	5 Years	5 years
Computers	3 years	3 years
Electrical Installations	10 years	10 years
Furniture and fixtures	10 years	10 years
Plant and Machinery	15 years	15 years
Software	5 years	5 years
Vehicles	8 years	8 years

h. Inventories:

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition . Cost formula used is FIFO/weighted average basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

i. Impairment of Assets:

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the consolidated statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the consolidated statement of profit and loss.

j. Retirement Benefits:

(i) Short-term employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits:

Defined Contribution Plan

'Retirement benefit in the form of provident fund and pension fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit Plans

Unfunded Plan: The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity.

Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

'The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

k. Borrowing Costs

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with Short Term/ Long Term borrowing of funds. Borrowing cost directly attributable to acquisition or construction of qualifying assets are capitalized as a part of the cost of the assets, upto the date the asset is ready for its intended use. All other borrowing costs are recognized in the Consolidated Statement of Profit and Loss in the year in which they are incurred.

l. Earnings per share:

The earnings in ascertaining the Company's EPS comprises the net profit after tax attributable to equity shareholders and includes the post tax effect of any extraordinary items. The number of shares used in computing basic EPS is the weighted average number of shares outstanding during the year.

Diluted earnings per share is computed by dividing the profit/(loss) after tax attributable to Equity Shareholders (including the post tax effect of extra ordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.

m. Taxation:

Tax expense for the year comprising current tax & deferred tax are considered in determining the net profit for the year. Provision is made for current tax and based on tax liability computed in accordance with relevant tax laws applicable to the Company. Provision is made for deferred tax for all timing difference arising between taxable incomes & accounting income at currently enacted or substantively enacted tax rates, as the case may be. Deferred tax assets (other than in situation of unabsorbed depreciation and carry forward losses) are recognized only if there is reasonable certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each Balance Sheet date. Deferred tax assets, in situation of unabsorbed depreciation and carry forward losses under tax laws are recognised only to the extent that where is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be recognised. Deferred Tax Assets and Deferred Tax Liability are been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liability and where the Deferred Tax Asset and Deferred Tax Liability relate to Income taxes is levied by the same taxation authority.

n. Provisions, Contingent Liabilities And Contingent Assets:

(i) Provisions

A provisions is recognized when the Company has a present obligation as a result of past event, if it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation.

(ii) Contingent Liability

Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only on the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

(ii) Contingent Assets

Contingent Assets are neither recognised nor disclosed in the financial statements.

o. Segment Reporting

Segment reporting is not applicable on the company.

p. Cash & Cash Equivalents

Cash & cash equivalents comprise cash and cash on deposit with banks and corporations. The company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amount of cash to be cash equivalents.

q. Leases

Leases where the Lessor effectively retains substantially all the risks and benefits of ownership of the Leased Asset, are classified as 'Operating Leases'. Lease rentals with respect to assets taken on 'Operating Lease' are charged to Statement of Profit and Loss on a straight line basis over the lease term.

Leases which effectively transfer to the Company substantially all the risks and benefits incidental to the ownership of the leased item are classified as 'Finance Lease'. Assets acquired on Finance Lease which substantially transfer all the risks and rewards of ownership to the Company are capitalized as assets by the Company at the lower of the fair value and the present value of the minimum lease payment and a liability is created for an equivalent amount. Lease rentals payable is apportioned between the liability and finance charge so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

r. Government Grants

Government grants / subsidies received towards specific fixed assets have been deducted from the gross value of the concerned fixed assets and grant / subsidies received during the year towards revenue expenses have been reduced from respective expenses.

Export benefits / incentives are accounted on accrual basis. Accordingly, estimated export benefits against exports affected during the year are taken into account as estimated incentives accrued till the end of the year. In case of License not revalidated after the date of expiry, the proportionate export benefit / incentive taken credit in earlier year(s) is written off in the year of expiry of License.

B SIGNIFICANT ACCOUNTING POLICIES

a. Basis of Preparation:

The financial statements have been prepared in accordance with the applicable Accounting Standards notified under Section 133 of the the Companies Act, 2013 read with Rule 7 of Companies (Accounts Rules), 2014 under historical cost convention on accrual basis.

All the assets and liabilities have been classified as current or non-current as per Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of activities, the Company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

b. Use of Equipment:

The preparation of the financial statements is in conformity with Indian GAAP (Generally Accepted Accounting Principles) which requires the management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent liabilities as on the date of the financial statements. The estimates and assumptions made and applied in preparing the financial statements are based upon management's best knowledge of current events and actions as on the date of financial statements. However, due to uncertainties attached to the assumptions and estimates made actual results could differ from those estimates. Any revision to accounting estimates is recognised prospectively in current and future periods.

c. Revenue Recognition

(i) Revenue from sale of goods is recognised when significant risk and rewards of ownership of the goods have been passed to the buyer and it is reasonable to expect ultimate collection. Sale of goods is recognised net of GST and other taxes as the same is recovered from customers and passed on to the government.

(ii) Revenue from providing services is recognised in the accounting period in which the services are rendered. Invoices are issued according to contractual terms and are usually payable as per the credit period agreed with the customer.

(ii) Interest is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

(iii) Other items of income and expenses are recognised on accrual basis.

(iv) Income from export entitlement is recognised as on accrual basis.

d. Investments:

Non-Current/ Long-term Investments are stated at cost. Provision is made for diminution in the value of the investments, if, in the opinion of the management, the same is considered to be other than temporary in nature. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

Current investments are carried at lower of cost and fair value determined on an individual basis. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

f. Property, Plant and Equipment:

(i) Tangible Assets

Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

g. Depreciation & Amortization:

Depreciation is calculated using the Straight Line method over their estimated useful lives. The estimates of useful lives of tangible assets are as follows:

Class of Assets	Useful life as per schedule II	Useful Life as per Company
Office equipment	5 Years	5 years
Computers	3 years	3 years
Electrical Installations	10 years	10 years
Furniture and fixtures	10 years	10 years
Plant and Machinery	15 years	15 years
Software	5 years	5 years
Vehicles	8 years	8 years

h. Inventories:

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition . Cost formula used is FIFO/weighted average basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

i. Impairment of Assets:

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

j. Retirement Benefits:

(i) Short-term employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits:

Defined Contribution Plan

'Retirement benefit in the form of provident fund and pension fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit Plans

Unfunded Plan:The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity.

Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

'The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

k. Borrowing Costs

Borrowing costs are interest, commitment charges and other costs incurred by an enterprise in connection with Short Term/ Long Term borrowing of funds. Borrowing cost directly attributable to acquisition or construction of qualifying assets are capitalized as a part of the cost of the assets, upto the date the asset is ready for its intended use. All other borrowing costs are recognized in the Statement of Profit and Loss in the year in which they are incurred.

l. Earnings per share:

The earnings in ascertaining the Company's EPS comprises the net profit after tax attributable to equity shareholders and includes the post tax effect of any extraordinary items. The number of shares used in computing basic EPS is the weighted average number of shares outstanding during the year.

Diluted earnings per share is computed by dividing the profit/(loss) after tax attributable to Equity Shareholders (including the post tax effect of extra ordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.

m. Taxation:

Tax expense for the year comprising current tax & deferred tax are considered in determining the net profit for the year. Provision is made for current tax and based on tax liability computed in accordance with relevant tax laws applicable to the Company. Provision is made for deferred tax for all timing difference arising between taxable incomes & accounting income at currently enacted or substantively enacted tax rates, as the case may be. Deferred tax assets (other than in situation of unabsorbed depreciation and carry forward losses) are recognized only if there is reasonable certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each Balance Sheet date. Deferred tax assets, in situation of unabsorbed depreciation and carry forward losses under tax laws are recognised only to the extent that where is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be recognised. Deferred Tax Assets and Deferred Tax Liability are been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liability and where the Deferred Tax Asset and Deferred Tax Liability relate to Income taxes is levied by the same taxation authority.

n. Provisions, Contingent Liabilities And Contingent Assets:

(i) Provisions

A provisions is recognized when the Company has a present obligation as a result of past event, if it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation.

(ii) Contingent Liability

Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only on the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

(ii) Contingent Assets

Contingent Assets are neither recognised nor disclosed in the financial statements.

o. Segment Reporting

Segment reporting is not applicable on the company.

p. Cash & Cash Equivalents

Cash & cash equivalents comprise cash and cash on deposit with banks and corporations. The company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amount of cash to be cash equivalents.

q. Leases

Leases where the Lessor effectively retains substantially all the risks and benefits of ownership of the Leased Asset, are classified as 'Operating Leases'. Lease rentals with respect to assets taken on 'Operating Lease' are charged to Statement of Profit and Loss on a straight line basis over the lease term.

Leases which effectively transfer to the Company substantially all the risks and benefits incidental to the ownership of the leased item are classified as 'Finance Lease'. Assets acquired on Finance Lease which substantially transfer all the risks and rewards of ownership to the Company are capitalized as assets by the Company at the lower of the fair value and the present value of the minimum lease payment and a liability is created for an equivalent amount. Lease rentals payable is apportioned between the liability and finance charge so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

r. Government Grants

Government grants / subsidies received towards specific fixed assets have been deducted from the gross value of the concerned fixed assets and grant / subsidies received during the year towards revenue expenses have been reduced from respective expenses.

Export benefits / incentives are accounted on accrual basis. Accordingly, estimated export benefits against exports affected during the year are taken into account as estimated incentives accrued till the end of the year. In case of License not revalidated after the date of expiry, the proportionate export benefit / incentive taken credit in earlier year(s) is written off in the year of expiry of License.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment ("FDI") through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) ("DPIIT"), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectorial cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. See "*Issue Procedure*" beginning on page 237 of this Prospectus.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectorial limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectorial cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See "*Issue Procedure*" beginning on page 237 of this Prospectus.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the

FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue Period.
